

Draft Tanzania Standard

Sensory analysis — Vocabulary

DRAFT STANDARD FOR PUBLIC COMMENT ONLY

NATIONAL FOREWORD

1.0 INTRODUCTION

This standard was adopted by sensory evaluation technical committee, under the supervision of Food and Agriculture Standards Divisional committee (AFDC).

This draft Tanzania standard is identical to ISO 5492:2008— Sensory analysis — Vocabulary which was published by International Organization for Standardization.

TERMINOLOGY AND CONVENTIONS.

This text of International standard, if found suitable, may be approved for publication as Tanzania standard without deviations.

Some terminologies and certain conventions are not identical with those used in Tanzania standards: attention is drawn especially to the following:-

1. The comma has been used as decimal marker for Metric dimensions. In Tanzania standards, it's currently practice to use "full point" on the baseline as decimal marker.
2. Where the words "International standard (s)" appear, referring to this standard they should read "Tanzania Standard(s)".

SCOPE

This International Standard defines terms relating to sensory analysis.

NOTE 1 Grammatical forms of terms have been indicated where it was felt useful to do so. It applies to all industries concerned with the evaluation of products by the sense organs. The terms are given under the following headings:

- 1) general terminology;
- 2) terminology relating to the senses;
- 3) terminology relating to organoleptic attributes;
- 4) terminology relating to methods.

NOTE 2 In addition to terms used in the three official ISO languages (English, French and Russian), this document gives the equivalent terms in German and Spanish; these are published under the responsibilities of the member bodies for Germany (DIN) and for Argentina (IRAM), respectively, and are given for information only. Only the terms and definitions given in the official languages can be considered as ISO terms and definitions.
