Oilseeds Residues—Determination of total ash
0.1 National Foreword

The Tanzania Bureau of Standards is the statutory national standards body for Tanzania, established under the Act No. 3 of 1975, amended by Act No. 2 of 2009.

This draft Tanzania standard is being prepared by the Fats and Oils Technical Committee, under the supervision of the Food and Agriculture Divisional Committee (AFDC).

This draft Tanzania standard is the identical adoption of ISO 749:1977 Oilseed residues – Determination of total ash published by International Organization for Standardization.

0.2 Terminology and conventions.

The text of the International standard is hereby being recommended for approval without deviation for publication as draft Tanzania standard.

Some terminology and certain conventions are not identical with those used as Tanzania Standard; attention is drawn to the following:

The comma has been used as decimal marker or metric dimensions. In Tanzania, its current practice to use a full point on the baseline as decimal marker.

Whenever the words “International Standard” appear, referring to this draft standard, they should read as “Tanzania Standard”.

0.3 Scope

This International Standard specifies a method for the determination of the total ash from residues (excluding compounded products) obtained by the extraction of oil from oilseeds by pressure or solvent.
