
TANZANIA BUREAU OF STANDARDS
National foreword

This draft Tanzania Standard is being prepared by the Mining and earth moving equipment technical committee (MMDC4), under the supervision of the Mining and Minerals Standards Divisional Committee (MMDC).

This draft Tanzania Standard is the identical adoption ISO 722:1991(E) Rock drilling equipment - Hollow drill steels in bar form, hexagonal and round, prepared by Technical Committee ISO/TC 82, Mining.

Some terminology and certain conventions are not identical with those used in Tanzania standards; attention is drawn especially to the following: -

- The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, it is current practice to use “full point” on the baseline as the decimal marker.
- Wherever the words ‘International Standard’ appears in the text, referring to this draft standard, they should read as ‘Tanzania Standard’
Scope

This draft Tanzania Standard specifies the dimensions of hexagonal and round drill steels in bar form used for rock drilling.
