

**DRAFT TANZANIA STANDARD**

---

**TBS/MMDC 3(2031) P3/ ISO 20905:2004 *Coal preparation -  
Determination of dust/moisture relationship for coal***

Draft Standard for public comments

**TANZANIA BUREAU OF STANDARDS**

## National foreword

This draft Tanzania standard is being prepared by the solid mineral fuels and related products technical committee (MMDC 3), under the supervision of the mining and minerals standards divisional committee (MMDC).

This draft Tanzania Standard is the identical adoption of 20905:2004 Coal preparations -- Determination of dust/moisture relationship for coal was prepared by ISO/TC 27, Solid mineral fuels, subcommittee SC 1, and coal preparation: Terminology and performance.

The ISO standard title on the cover page has been written in bilingual, for the purpose of this Tanzania standard only English text of the title should be used.

Some terminology and certain conventions are not identical with those used in Tanzania standards; attention is drawn especially to the following: -

- The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, it is current practice to use "full point" on the baseline as the decimal marker.
- Wherever the words 'International Standard' appears in the text, referring to this draft standard, they should read as 'Tanzania Standard'.
