TBS/MMDC 6 (6465) P3/ ISO 10469:2006 Copper sulfide concentrates - Determination of copper - Electrogravimetric method

TANZANIA BUREAU OF STANDARDS
National foreword

This draft Tanzania standard is being prepared by the Ores and Concentrates Technical Committee (MMDC 6), under the supervision of the Mining and Minerals Standards Divisional Committee (MMDC).

This draft Tanzania Standard is the identical adoption of ISO 10469:2006 Copper sulfide concentrates - Determination of copper - Electrogravimetric method which was prepared by ISO/TC 183, Copper, lead, zinc and nickel ores and concentrates.

The ISO standard title on the cover page has been written in bilingual, for the purpose of this Tanzania standard only English text of the title should be used.

Some terminologies and certain conventions are not identical with those used in Tanzania standards; attention is drawn especially to the following:

- The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, it is current practice to use “full point” on the baseline as the decimal marker.

- Wherever the words ‘International Standard’ appears in the text, referring to this draft standard, they should read as ‘Tanzania Standard’.
Scope

This draft Tanzania I Standard specifies an electrogravimetric method for the determination of the mass fraction of copper in copper sulfide concentrates in the range 15 % to 50 %.
