## DRAFT TANZANIA STANDARD

---

Fertilizers — Sampling from a conveyor by stopping the belt

DRAFT TANZANIA STANDARD FOR STAKEHOLDERS COMMENTS ONLY

TANZANIA BUREAU OF STANDARDS

---

## **0. National Foreword**

The Tanzania Bureau of Standards is the statutory national standards body for Tanzania, formally established by the Act.No.3 of 1975, which was amended and repealed by Act.No.2 of 2009.

The Fertilizers, soil conditioners and beneficial substances Technical Committee, under the supervision of the Agriculture and Food Standards Divisional Committee (AFDC), has prepared this Tanzania Standard.

This Tanzania standard is the identical adoption to ISO 3963:1977- Fertilizers — Sampling from a conveyor by stopping the belt.

### **Terminology and conventions**

The text of the International Standard is hereby being recommended for approval without deviation for publication as Tanzania standard.

Some terminologies and certain conventions are not identical with those used in Tanzania standards; attention is drawn to the following: -

- 1) The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, it is current practice to use “full point” on the baseline as the decimal marker.
- 2) Where the words “International Standard(s)” appear, referring to this draft standard they should read “Tanzania Standard(s)”.

## **1. Scope**

This document specifies a reference method for sampling all solid fertilizers transported on a conveyor belt from the place of manufacture or storage to some other location.
