## DRAFT TANZANIA STANDARD

---

Fertilizers — Presentation of sampling reports

DRAFT TANZANIA STANDARD FOR STAKEHOLDERS COMMENTS ONLY

TANZANIA BUREAU OF STANDARDS

---

## **0. National Foreword**

The Tanzania Bureau of Standards is the statutory national standards body for Tanzania, formally established by the Act.No.3 of 1975, which was amended and repealed by Act.No.2 of 2009.

The Fertilizers, soil conditioners and beneficial substances Technical Committee, under the supervision of the Agriculture and Food Standards Divisional Committee (AFDC), has prepared this Tanzania Standard.

This Tanzania standard is the identical adoption to ISO 5306:1983 - Fertilizers — Presentation of sampling reports.

## **Terminology and conventions**

The text of the International Standard is hereby being recommended for approval without deviation for publication as Tanzania standard.

Some terminologies and certain conventions are not identical with those used in Tanzania standards; attention is drawn to the following: -

- 1) The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, it is current practice to use “full point” on the baseline as the decimal marker.
- 2) Where the words “International Standard(s)” appear, referring to this draft standard they should read “Tanzania Standard(s)”.

## **1. Scope**

This International Standard specifies the information to be given in sampling reports for consignments of fertilizers.

NOTE: An example of a typical sampling report is given in the annex.
