

## **DRAFT TANZANIA STANDARD**

---

**Animal and vegetable fats and oils — Determination of refractive index**

DRAFT STANDARD

**TANZANIA BUREAU OF STANDARDS**

---

## 0 National foreword

This draft Tanzania Standard is the identical adoption of ISO 6320:2017 ***Animal and vegetable fats and oils — Determination of refractive index*** published by International Organization for Standardization.

## 1 Terminology and conventions.

Some terminologies and certain conventions in the ISO standards are not identical with those used in Tanzania Standards and attention is drawn to the following:

The comma (,) has been used as a decimal marker (.) for metric dimensions. In Tanzania Standards, it is current practice to use a full point on the base line as the decimal marker.

Wherever the words “International Standard” appear in this Tanzania Standard, they should be interpreted as “Tanzania Standard”.

## 2 Scope

This document specifies a method for the determination of the refractive index of animal and vegetable fats and oils.

Milk and milk products (or fat coming from milk and milk products) are excluded from the scope of this document.
