DRAFT TANZANIA STANDARD

Textiles — Fibres and yarns — Determination of commercial mass of consignments — Part 3: Specimen cleaning procedures

Draft for Stakeholders' Comments Only

TANZANIA BUREAU OF STANDARDS

National Foreword

This Draft Tanzania Standard is identical to ISO 6741-3:1987, *Textiles — Fibres and yarns — Determination of commercial mass of consignments — Part 3: Specimen cleaning procedures*; published by the International Organization for Standardization.

Some terminologies and certain conventions used in International Standards are not identical with those used in Tanzania Standards and attention is drawn especially to the following:

The comma has been used as a decimal marker for metric dimensions. In Tanzania, it is current practice to use a “full point” on the baseline as a decimal marker.

Wherever the words ‘International Standard’ appear referring to this document, they should be interpreted as ‘Tanzania Standard’.

Scope

This part of ISO 6741 specifies specimen cleaning procedures to be used when the commercial mass is to be determined in accordance with ISO 6741-1 on a clean and dry basis.

The procedure appropriate for a particular fibre is given in ISO 6741-4. If the commercial mass is to be determined on a dry-only basis, cleaning is omitted.
