DRAFT TANZANIA STANDARD

Footwear — Test methods for uppers, linings and insocks — Tear strength

Draft for Stakeholders' Comments Only

TANZANIA BUREAU OF STANDARDS

National Foreword

This Draft Tanzania Standard is identical to ISO 17696:2004, *Footwear — Test methods for uppers, linings and insocks — Tear strength*; published by the International Organization for Standardization.

Some terminologies and certain conventions used in International Standards are not identical with those used in Tanzania Standards and attention is drawn especially to the following:

The comma has been used as a decimal marker for metric dimensions. In Tanzania, it is current practice to use a “full point” on the baseline as a decimal marker.

Wherever the words ‘International Standard’ appear referring to this document, they should be interpreted as ‘Tanzania Standard’.

Scope

This European Standard specifies a test method for assessing the tear strength of upper, linings and insocks or complete upper assembly, irrespective of material, in order to assess the suitability for the end use.
