DRAFT TANZANIA STANDARD

Textiles — Tests for colour fastness — Part D02: Colour fastness to rubbing: Organic solvents

Draft for Stakeholders' Comments Only

TANZANIA BUREAU OF STANDARDS

National Foreword

This Draft Tanzania Standard is identical to ISO 105-D02:2016, *Textiles — Tests for colour fastness — Part D02: Colour fastness to rubbing: Organic solvents*; published by the International Organization for Standardization.

Some terminologies and certain conventions used in International Standards are not identical with those used in Tanzania Standards and attention is drawn especially to the following:

The comma has been used as a decimal marker for metric dimensions. In Tanzania, it is current practice to use a “full point” on the baseline as a decimal marker.

Wherever the words ‘International Standard’ appear referring to this document, they should be interpreted as ‘Tanzania Standard’.

Scope

This part of ISO 105 specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms, except loose fibre, to the combined action of rubbing and of organic solvents used in spot-cleaning, localized “spotting” carried out by hand.
