

DRAFT TANZANIA STANDARD

TBS/MMDC 6 (332) P3/ ISO 3082:2017 Iron ores - Sampling and sample preparation procedures

DRAFT STANDARD FOR PUBLIC COMMENTS ONLY

TANZANIA BUREAU OF STANDARDS

National foreword

This draft Tanzania standard is being prepared by the Ores and Concentrates Technical Committee (MMDC 6), under the supervision of the Mining and Minerals Standards Divisional Committee (MMDC).

This draft Tanzania standard is the identical adoption of **ISO 3082:2017** Iron ores -- Sampling and sample preparation procedures which was prepared by ISO/TC 102, Iron ore and direct reduced iron.

The ISO standard title on the cover page has been written in bilingual, for the purpose of this Tanzania standard only English text of the title should be used.

Some terminologies and certain conventions are not identical with those used in Tanzania standards; attention is drawn especially to the following: -

- The comma has been used as a decimal marker for metric dimensions. In Tanzania standards, it is current practice to use “full point” on the baseline as the decimal marker.
- Wherever the words ‘International Standard’ appear in the text, referring to this draft standard, they should read as ‘Tanzania standard’.
