

DRAFT TANZANIA STANDARD

Fruits, vegetables and derived products — Determination of ascorbic acid content — Part 2: Routine methods

FOR STAKEHOLDERS' ONLY

TANZANIA BUREAU OF STANDARD

National foreword

This Tanzania Standard is identical to ISO 6557-2: 1984 (Confirmed 2017), *Fruits, vegetables and derived products — Determination of ascorbic acid content — Part 2: Routine methods*, published by the International Organization for Standardization (ISO).

This third edition cancels and replaces the second edition (TZS 1498: 2015), which has been technically revised.

Terminology and conventions

Some terminology and certain conventions in the ISO standards are not identical with those used in Tanzania Standards and attention is drawn to the following:

The comma (,) has been used as a decimal marker (.) for metric dimensions. In Tanzania Standards, it is current practice to use a full point on the base line as the decimal marker.

Wherever the words “International Standard” appear in this Tanzania Standard, they should be interpreted as “Tanzania Standard”.
