

TANZANIA STANDARD

Fruits, vegetables and derived products – Sampling and methods of test – Part 13: Determination of volatile acidity

FOR STAKEHOLDERS' COMMENTS ONLY

National foreword

This Tanzania Standard is identical to ISO 6632-1981 (Confirmed 2016), *Fruits, and vegetables and derived products – Sampling and methods of test – Part 13: Determination of volatile acidity* published by the International Organization for Standardization (ISO).

This second edition cancels and replaces the first edition (TZS 1497: 2015), which has been technically revised.

Terminology and conventions

Some terminology and certain conventions in the ISO standards are not identical with those used in Tanzania Standards and attention is drawn to the following:

The comma (,) has been used as a decimal marker (.) for metric dimensions. In Tanzania Standards, it is current practice to use a full point on the base line as the decimal marker.

Wherever the words “International Standard” appear in this Tanzania Standard, they should be interpreted as “Tanzania Standard”
