

TANZANIA STANDARD

Fruits and Vegetables – Determination of Benzoic Acid Content-Spectrophotometric Method

FOR STAKEHOLDERS' COMMENTS ONLY

TANZANIA BUREAU OF STANDARD

National foreword

This Tanzania Standard is identical to ISO 5518 (2007), *Fruits and Vegetables – Determination of Benzoic Acid Content-Spectrophotometric Method* published by the International Organization for Standardization (ISO).

This second edition cancels and replaces the first edition (TZS 1494: 2015), which has been technically revised.

Terminology and conventions

Some terminology and certain conventions in the ISO standards are not identical with those used in Tanzania Standards and attention is drawn to the following:

The comma (,) has been used as a decimal marker (.) for metric dimensions. In Tanzania Standards, it is current practice to use a full point on the base line as the decimal marker.

Wherever the words “International Standard” appear in this Tanzania Standard, they should be interpreted as “Tanzania Standard”.
