

Draft Tanzania Standard

Sensory analysis — Methodology — Magnitude estimation method

DRAFT STANDARD FOR PUBLIC COMMENTS ONLY

NATIONAL FOREWORD

1.0 INTRODUCTION

This standard was adopted by sensory evaluation technical committee, under the supervision of Food and Agriculture Standards Divisional committee (AFDC).

It is identical to ISO 11056:1999— Sensory analysis — Methodology — Magnitude estimation method. which was published by International Organization for Standardization.

TERMINOLOGY AND CONVENTIONS.

This text of International standard, if found suitable, may be approved for publication as Tanzania standard without deviations.

Some terminologies and certain conventions are not identical with those used in Tanzania standards: attention is drawn especially to the following: -

1. The comma has been used as decimal marker for Metric dimensions. In Tanzania standards, it's currently practice to use "full point" on the baseline as decimal marker.
2. Where the words "International standard (s)" appear, referring to this standard they should read "Tanzania Standard(s)".

SCOPE

This Standard describes a method for applying magnitude estimation to the evaluation of sensory attributes. The methodology specified covers the training of assessors, and obtaining magnitude estimations as well as their statistical interpretation.
