

Draft Tanzania Standard

Cigarettes — Determination of total and nicotine-free dry particulate matter using a routine analytical smoking machine.

DRAFT STANDARD FOR THE PUBLIC COMMENTS ONLY

TANZANIA BUREAU OF STANDARDS

NATIONAL FOREWORD

1.0 INTRODUCTION

This draft standard was adopted by Tobacco and Tobacco products technical committee, under the supervision of Food and Agriculture Standards Divisional committee (AFDC).

This draft standard specifies methods for the determination of total particulate matter and for the subsequent determination of nicotine-free dry particulate matter present in the smoke from cigarettes generated and collected using a routine analytical smoking machine.

It is identical to ISO 4387:2019 Cigarettes — Determination of total and nicotine-free dry particulate matter using a routine analytical smoking machine. Which was published by International Organization for Standardization.

TERMINOLOGY AND CONVENTIONS.

This text of International standard, if found suitable, may be approved for publication as Tanzania standard without deviations.

Some terminologies and certain conventions are not identical with those used in Tanzania standards: attention is drawn especially to the following: -

1. The comma has been used as decimal marker for Metric dimensions. In Tanzania standards, it's currently practice to use "full point" on the baseline as decimal marker.
2. Where the words "International standard (s)" appear, referring to this standard they should read "Tanzania Standard(s)".
