DRAFT TANZANIA STANDARD

Water quality - Sampling - Part 10: Guidance on sampling of waste waters

National foreword

This Tanzania Standard is identical to ISO 5667-10, Water quality - Sampling -Part 10: Guidance on sampling of waste waters, published by the International Organization for Standardization (ISO).

This standard contains details on the sampling of domestic and industrial waste water, i.e., the design of sampling programmes and techniques for the collection of, samples. It covers waste water in all its forms, i.e., industrial waste water, and crude and treated domestic waste water.

Terminology and conventions

Some terminology and certain conventions in the ISO standards are not identical with those used in Tanzania Standards and attention is drawn to the following:

the comma (,) has been used as a decimal marker for metric dimensions. In Tanzania Standards, it is current practice to use a full point (.) on the base line as the decimal marker and

wherever the words “International Standard” appear in this Tanzania Standard, they should be interpreted as “Tanzania Standard”.

1. Scope

This document contains details on the sampling of domestic and industrial waste water, i.e., the design of sampling programmes and techniques for the collection of samples. It covers waste water in all its forms, i.e., industrial waste water, radioactive waste water, cooling water, raw and treated domestic waste water.

It deals with various sampling techniques used and the rules to be applied so as to ensure the samples are representative.

Sampling of accidental spillages is not included, although the methods described in certain cases may also be applicable to spillages.
