

## **DRAFT TANZANIA STANDARD**

---

**Aggregates for concrete- Test methods for mechanical and physical properties -Part 2: Method for determination of resistance to fragmentation by Los Angeles Test (LA-Test)**

**TANZANIA BUREAU OF STANDARDS**

---

## 0.National foreword

The Tanzania Bureau of standards is the statutory national standards body for Tanzania, established under the act.No.3 of 1975, amended by act.No.2 of 2009

This finalized Tanzania standard is being prepared by the Aggregates, Sand and Concrete Technical Committee, under the supervision of the Building and Construction Divisional Standards Committee (BCDC)

This Draft Tanzania Standard is identical adoption of **ISO 20290-2 Aggregates for concrete — Test methods for mechanical and physical properties —Part 2: Method for determination of resistance to fragmentation by Los Angeles Test (LA-Test)** published by the International Organization for Standardization (ISO).

## Terminologies and conventions

The text of the International standard is hereby being recommended for adoption without deviation for publication as draft Tanzania standard.

Some terminologies and certain conventions are not identical with those used as Tanzania standards; attention is drawn to the following:

The comma has been used as a decimal marker for metric dimensions. In Tanzania, it is current practice to use a full point on the baseline as the decimal marker.

Wherever the words “International Standard” appear, referring to this standard, they should read as “Tanzania Standard”.

## 1 Scope

This document describes the Los Angeles test, for determining the resistance to fragmentation of coarse aggregates.
