TBS BOARD OF DIRECTORS

The Bureau had no Board of Directors during the period under review as the previous Board had expired and the new Board was yet to be appointed.

LETTER OF TRANSMITTAL

Hon. Innocent Lugha Bashungwa (MP)
Minister for Industry and Trade
P O Box 2996
Dodoma

Honorable Minister,

Tanzania Bureau of Standards is the national standards body under the Ministry of Industry and Trade responsible for development of standards, promoting standardization and undertaking measures on quality and safety control of products. For the financial year 2019/2020, the Bureau implemented plans as reflected in the Five-Year Strategic Plan from 2016/2017 – 2020/2021, the Annual Budget and Action Plan, the Performance Contract signed between the Board of Directors and Treasury Registrar, Ruling party Manifesto and other Government directives. Aforesaid, I hereby submit the annual report on the performance of TBS for the financial year 2019/2020 as mandated by the Standards Act No. 2 of 2009 and amendments on the Finance Act No. 8 of 2019. This report combines both the Director General’s report on corporate business and the Audited Annual Accounts of the Bureau for the period ended 30th June, 2020.

A handwritten signature in black ink, appearing to read 'Riziki Shemdoe'. The signature is fluid and cursive.

.....
Prof. Riziki Silas Shemdoe
Permanent Secretary, Ministry of Industry and Trade (MIT)

ICT Manager*

Mr. Hamisi Sudi
*Research, Training
and Market
Surveillance Manager*

CPA Chihimba P Nyenela
Chief Internal Auditor

Dr. Athuman Y Ngenya
Director General

CHAIRPERSON'S STATEMENT

According to the Standards Act Cap.130, Tanzania Bureau of Standards (TBS) is the custodian and overseer of the observance and implementation of standards in Tanzania through Standardization, Quality Assurance, Metrology and Testing (SQMT) services with the aim of providing supportive infrastructure for growth of industries and commerce within the country.

During the period under review, the Bureau continued to represent Tanzania's interests in regional and international standards bodies such as East African Standards Committee (EAC), Southern African Development Community (SADC) and African Regional Organization for Standardization (ARSO). Others include International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and the FAO/WHO Codex Alimentarius Commission.

The Bureau's major sources of income continued to be the Government, development partners and TBS own internal sources. The Bureau enjoyed tremendous support from development partners such as TMEA and SADC. Despite the achievements, the Bureau encountered some challenges including limited space in the laboratories, shortage of modern equipment for testing of samples in the laboratories, existence of unofficial ports/routes and shortage of personnel (human resources).

In order to ensure its services are accessible to many Tanzanians, the Bureau in collaboration with the Government is implementing a number of strategies, including finalizing the construction of a Test House — a six-storey building in Dar es Salaam aimed at overcoming the challenge of limited space in the laboratories. On the issue of equipment, the Bureau sets funds each year for the purchase of modern equipment and the renovation of existing facilities. In addition, some equipment have been acquired through development partners including the European Union through Trademark East Africa and SADC Trade Related Facility (TRF). In order to curb the influx of substandard products, TBS will open more border offices. Moreover, the Bureau will strengthen cooperation with other stakeholders especially TRA, FCC, ZBS, TPA, GS1, TFDA, EWURA, TCRA and the police so as to reduce entrance of products through unofficial ports/routes. On the issue of human resources, TBS through the Ministry of Industry and Trade has continued to communicate with the President's Office, Public Service Management and Good Governance to request for grant of employment permits in every financial year. TBS has presented an establishment of 750 personnel by June, 2021 and has continued to request and been granted employment permits in every financial year. Furthermore, TBS continued to communicate with the President's Office, Public Service Management and Good Governance concerning the approval of new salary structure that fits the Bureau's needs.

Lastly, TBS has informed higher authorities on the absence of the Board of Directors as in the meantime all issues that required Board endorsement are being forwarded to the Permanent Secretary of the Ministry of Industry and Trade.

To sum up, in lieu of the TBS Board of Directors, I wish to express my appreciation to Management and the entire staff of the Bureau for their indulgence and tireless efforts which have made this year successful.

.....
Dr. Athuman Y Ngenya
TBS Director General
In lieu of the Chairperson,
TBS Board of Directors

DIRECTOR GENERAL'S REPORT

1. BACKGROUND

1.1. Establishment

Tanzania Bureau of Standards was established by the Standards Act. No. 3 of 1975 under the name of the National Standards Institute. The Institute became operational on 16th April, 1976 vide Government Notice No. 173 of 1976. Its name was changed to the present one of Tanzania Bureau of Standards under Act No. 1 of 1977. In March 2009, the Standards Act No. 3 of 1975 was repealed and replaced by the Standards Act No. 2 of 2009 which came to be operational in June 2009, aiming at giving TBS more powers to oversee the implementation of standards. Also following the amendments of the Financial Act No. 8 2019 of, TBS has been given new responsibilities concerning food and cosmetics safety.

These activities were previously under the former Tanzania Food and Drugs Authority (TFDA). TBS is a parastatal organization under the Ministry of Industry and Trade and the sole National Standards Body for Tanzania.

1.2. Core Functions

The Bureau's mandate is to promote standardization and quality assurance in industry and commerce sectors. The major functions of TBS are as enumerated hereunder: -

a) Formulation and promulgation of Tanzania Standards in all sectors of the country's economy.

b) Implementation of promulgated standards through third party certification schemes including the Standards Mark Scheme.

c) Improvement of quality of industrial products both for export and local consumption through various certification schemes like pre-export inspection and testing, batch certification scheme, tested product certification scheme and quality system registration.

d) Promotion of standardization and quality assurance services in industry and commerce through training of personnel on company standardization, quality management, quality assurance, laboratory techniques, accreditation, packaging technology and Hazard Analysis Critical Control Points (HACCP).

e) Undertaking testing of product samples in the course of implementing standards, as requested by manufacturers, to verify consumer complaints or for proficiency testing.

f) Undertaking calibration of industrial and commercial measuring equipment and instruments as the custodian of national measurement standards.

g) Provision of quality assurance services in foreign countries through Pre-Shipment Verification of Conformity to standards (PVoC).

h) Registration of food, food products and cosmetics.

i) Registration of food and cosmetics premises.

1.3. TBS Information Centre

TBS has a well-equipped library which caters for standards and standards associated information needs of industrialists, researchers, academicians and the business community. It keeps abreast of latest developments in standards, standard-type documents, standards catalogues, monographs, technical journals, technical regulations/directives, etc. The library is accountable for identification, gathering and dissemination of information on national, foreign, regional and international standards and on all matters related to standardization and quality assurance.

The library offers up-to-date information and documentation services to its clients with the support of modern and traditional technologies, which include the use of Online Public Access Catalogue (OPAC).

The standards catalogue can be searched either directly from the TBS website through the internet or manually from the standard catalogue found in the library.

TBS library serves as the focal point through which local and other interested parties can purchase national, regional, and international standards. The agreement between National Standards Bodies and the International Organization for Standardization (ISO) recognizes Tanzania Bureau of Standards as the sole sales agent of foreign standards in Tanzania, to local clients including but not limited to manufacturers, importers, industrialist, educationists, and Non-Governmental Organizations (NGOs).

The library provides inquiry and information services on numerous issues concerning standards and quality assurance. The library staff responds to written, telephone, fax, e-mail and walk-in requests for information. It offers information on standards and standards related materials to TBS staff, industrialists, business community, academia, researchers, and consumers. Searches are made using various hard copy documents, CD-ROMs, flash disks, the internet and by consulting professionals and standards-developing personnel. The library preserves Tanzania national standards, foreign national standards, international standards like ISO, IEC, Codex Alimentarius standards, laws and regulations.

Tanzania Bureau of Standards is the TBT National Enquiry Point for Tanzania. The Enquiry Point enables enterprises to find out the requirements for access to market of WTO members so that they can make preparations to comply with these requirements. It also carries out the following:

- Responding to enquiries on technical regulations, standards and conformity assessment procedures;
- Obtaining, compiling and disseminating notifications on TBT that are issued by WTO Secretariat to stakeholders in Tanzania; and Obtaining, compiling and processing notifications on TBS that are issued by TBT regulators to WTO members through WTO Secretariat.

The services offered by the TBT National Enquiry Point to business enterprises are:

- Identification of technical requirements (technical regulations, standards and conformity assessment procedures) for market access for business enterprises.
- Obtaining technical requirements for business enterprises from WTO members.
- Provision of notifications on proposed technical regulations and conformity assessment procedures issued by WTO Secretariat.
- Obtaining information from National Enquiry Point of WTO members; and
- Obtaining relevant TBT documents from WTO Secretariat for stakeholders.

1.4. Organizational Structure

The current organizational structure of TBS is hinged upon a typical scientific institutional structure with policy-cum-functional powers vested in the Board of Directors to which the Director General is answerable. The organizational structure of the Bureau is made up of four directorates namely standards development, quality management, testing and metrology as well as human resources and administration.

Operationally, an elaborate committee system exists, through which national standards are processed and approved. The committee system includes technical committees responsible for initial scrutiny of drafts presented by the TBS secretariats, the divisional committees responsible for setting out priorities for standardization projects and endorsing drafts scrutinized by the technical committees and the Board of Directors of TBS which is responsible for setting out policy and for approval of finalized draft standards into national standards. The implementation of standards is done by direct interaction with industry and commerce through various schemes and testing services provided to manufacturers.

2. ACTIVITIES REPORT

2.1. Introduction

Economic Overview

According to African Development Bank Group overview of Tanzania Economic Outlook, growth slowed to 2.1% in 2020 from 6.8% in 2019 because of COVID-19. The growth was driven mainly by construction and manufacturing on the supply side and investments on the demand side. Monetary policy was accommodative to support credit and economic growth. Inflation fell to 3.3% in 2020 from 3.5% in 2019, due to a steady decline in food prices. Exchange rates remained stable, partly due to the Bank of Tanzania's interventions to ensure stability in the foreign exchange market. The government's fiscal consolidation helped to reduce recurrent expenditures, but the adverse effect of COVID-19 on revenues increased the fiscal deficit slightly from 2.0% of GDP in 2019 to 2.3% of GDP in 2020—which still is lower than the government target of 5%.

The deficit was financed largely by domestic borrowing. The current account deficit improved slightly to 3.2% of GDP from 3.4% in 2019 due to better export performance,

particularly gold exports. The non-performing loans ratio increased from 9.8% in December 2019 to 11.0% in April 2020, mainly because of liquidity constraints in the private sector, in part due to COVID-19. The number of Tanzanians living below the poverty line increased as the pandemic caused weakness in sectors with high employment potential, notably agriculture and manufacturing. It was estimated that the pandemic could push an additional 500,000 Tanzanians below the poverty line. Inequality is also likely to have widened further during the pandemic.

Outlook and risks

The economic outlook is positive, with real GDP projected to grow 4.1% in 2021 and 5.8% in 2022, due to improved performance of the tourism sector and the reopening of trade corridors. Energy and fuel price increases are expected to persist in 2021, raising overall inflation to 3.9% in 2021 and 3.4% in 2022. Spending on large infrastructure projects and depressed revenue performance are expected to widen the fiscal deficit to 3.2% of GDP in both 2021 and 2022, financed mainly by external borrowing. The current account deficit is projected to grow to 3.9% of GDP in 2021, due to the lingering effects of COVID-19 on merchandise exports and increased imports of capital goods for large infrastructure projects. It is expected to narrow to 3.3% of GDP in 2022. The major downside risks to the outlook include business regulatory bottlenecks that constrain private sector activity and uncertainties regarding the pandemic. Poverty and unemployment are expected to remain high due to depressed private sector activity.

2.2. Standards Preparation

2.2.1. Finalized standards

During the year 2019/2020, the standards development directorate finalized a total of 555 standards compared to 456 standards in the previous year. The standards were developed under its various sector-based sections.

Some of the standards finalized under the General Techniques Section include standards on requirements for good financial grant practice, requirements for tourist information and reception services and related services, recommendations for beach operation, requirements and recommendations for adventure tourism good practices for sustainability, specification for garbage bags,

specification for aluminum foil, guidelines for the selection of quality management system consultants and use of their services, guidelines for the quality management in projects, and requirements for the operation of various types of bodies performing inspection and risk management guidance for the implementation of ISO 31000.

Standards finalized in the Food and Agriculture Section were general guidance for measuring odor, specification for stingless bee honey, determination of tryptophan content in animal feeding stuffs, specification for butter, specification for compounded fish feeds, specification for ghee, specification for compounded pig feeds, specification for fortified milled maize (corn) products, specification for finger millet grains, specification for whole sorghum grains, specification for composite flour, specification for edible full fat soya flour, specification for fortified wheat flour, specification for compounded poultry feeds, determination of vitamin A by high performance liquid chromatography, determination of mercury by flameless atomic absorption spectrophotometric method, specification for jams, jellies and marmalade, specification for vinegar from natural sources and pickles.

Testing of plastic pipes in the Building and Construction Laboratory

Standards finalized in the Mechanical Engineering Section were general requirements for fire resistance tests for door and shutter assemblies, general requirements for atmospheric corrosion testing in metals and alloys, general requirements for industrial safety helmets, content and structure for vehicle identification number (VIN),

general-purpose collapsible water hose, specification for cold rolled steel sections, requirements for gas volume meters, general technical delivery conditions for hot-rolled products, technical delivery conditions for fine grain structural steels, general principles for weld ability of metallic materials, vocabulary for gas welding equipment, qualification testing of welders steels and sowing equipment and test methods for single seed drills (precision drills).

Standards finalized in the Building & Construction Section were determination of creep of concrete cylinders in compression, test methods for infiltration rate in pervious concrete, test methods for density and void content in pervious concrete, specification for copper/chromium/arsenic composition for the preservation of timber, specification for wood preservation by means of pressure creosoting, specification for wood poles and blocks for power and telecommunication lines, specification for preservative-treated timber, specifically hardwood furniture timber; and specification for resilient floor coverings expanded(cushioned) poly (vinylchloride) floor covering.

Standards finalized in the Electrical Engineering Section include specification for bayonet lamp holders, generic specification for multicore and symmetrical pair/quad cables for digital communications, capacity evaluation method for photovoltaic system performance, capacity evaluation method for optical fibre cables, basic optical cable test procedures, rating and performance of design guidelines and recommendations for rotating electrical machines, particular requirements for electric irons for household and similar uses, general requirements for switches for household and similar fixed electrical installations, and general requirements and methods of test for terrestrial photovoltaic (pv) modules design qualification and type approval.

Standards finalized in the Chemical Section include specification for automotive gasoline (premium motor spirit), specification for automotive gas oil (automotive diesel), specification for thermal paper rolls, specification for diary books, specification for paper used for printing maps and architectural drawings, specification for liquefied petroleum gases (LPG), specification for scholastic exercise books, specification for varnishes for interior surfaces, specification for constituent material and mixtures, solvent-based paint remover, specification for road marking paints and specification for hot applied thermoplastic road marking paint.

Standards finalized in the Mining Section include rock drilling equipment - hollow drill steels in bar form hexagonal and round, guidelines for the systematic evaluation of coal resources and coal reserves, geological exploration for water reservoir sites – code of practice, mineral processing terminology comminution, solid mineral fuels evaluation of the measurement performance of on-line analyzers, determination of copper content in copper sulfide using concentrates titrimetric methods, mining and earth-moving machinery, vocabulary for rock drill rigs and rock reinforcement rigs.

Standards finalized in the Environmental Section were such as specifications for performance, design and test apparatus for industrial gamma radiography, manual determination of mass concentration of particulate matters in stationary source emissions, design principles and considerations for the choice of appropriate materials in neutron radiation protection shielding, design principles and considerations for the choice of appropriate materials in neutron radiation protection shielding and determination of mass concentration of sulphur dioxide in stationary source emissions using hydrogen peroxide/barium perchlorate/thorin method.

TBS Director General Dr. Athuman Y. Ngenya (centre, seated) poses with winners of the 7th Essay Competition for Students of Higher Learning Institutions during the commemoration of African Standardization Day in 2020.

Standards finalized in the Textile and Leather Section were such as determination for mass per unit area in nonwovens, determination of bending length in nonwovens, determination of drapability including drape coefficient in nonwovens, demand absorbency in nonwovens, cover-stock wetback in nonwovens and determination of water penetration (spray impact) in nonwovens.

The total number of national standards finalized during the year 2019/2020 in various sectors is 555 as indicated in Table 1.

Table 1: Standards finalized per sector in 2019/2020

S/N	Sector /	Number of Standards		
	Sub-sector	Target	Actual	%
1	Agriculture and food	100	184	184.0
2	Chemical and chemical products	50	53	106.0
3	Textiles	50	55	110.0
4	Environment	40	29	72.5
5	Mechanical engineering	45	69	153.3
6	Electrical engineering	45	60	133.3
7	Building & construction	40	40	100.0
8	General techniques	40	29	72.5
9	Mining engineering	40	36	90.0
TOTAL		450	555	123.3

2.2.2. Meetings

A total of 157 meetings were convened by the standards development directorate during the period under review. These included 17 divisional committee meetings, 94 technical committee meetings, 20 national consultative meetings and 26 working group meetings. The standardization projects deliberated upon by various meetings included those in the following areas:

a) Food and Agriculture

- i) Roasted macadamia kernel -Specification
- ii) Sesame - Specification
- iii) Chia seeds - Specification
- iv) Cheese - Specification
- v) Infant formula - Specification
- vi) Monitoring and sampling of fortified foods - Guideline
- vii) Dried banana -Specification
- viii) Amaranth flour -Specification
- ix) Desiccated coconut - Specification
- x) Paratha (chapati) dough - Specification
- xi) Bakery and biscuit manufacturing units - Code of hygiene
- xii) Foodstuffs - Determination of fumonisin B1 and B2 in maize based foods using immunoaffinity column clean-up and HPLC method with fluorescence detection.

b) Chemicals

- i) Surgical sutures - Specification - Part 1: Absorbable
- ii) Surgical sutures - Specification - Part 2: Non-absorbable
- iii) Light kaolin - Specification
- iv) Sodium bicarbonate - Specification
- v) Sulphuric acid - Code of safety
- vi) Household laundry detergent bars - Specification
- vii) Thermal paper rolls – Specification
- viii) Mosquito repellent soap – Specification
- ix) Neem herbal soap – Specification (revision TZS 883: 2005)
- x) Mosquito repellent soap – Specification

c) Textile

- i) Re usable sanitary towels – Specification
- ii) Footwear – Test methods for uppers and lining – Water vapour permeability and absorption
- iii) Footwear – Test methods for outsoles – Compression energy
- iv) A-twill bag – Specification
- v) Flexible intermediate bulk containers for non-dangerous goods
- vi) B-twill jute cloth – Specification
- vii) General labelling of all products manufactured from textiles
- viii) General labelling of all products manufactured from textiles
- ix) Menstrual tampon – Specification
- x) Disposable panty liner – Specification

d) Environment

- i) Guidelines for planning the samples of atmosphere and location of monitoring stations
- ii) Stationary source emissions – Manual determination of mass concentration of particulate matters
- iii) Stationary source emissions – Determination of mass concentration of nitrogen oxides: Naphthyl ethylene diamine photometric method
- iv) Stationary source emissions – Manual determination of mass concentration of particulate matters
- v) Guidelines for planning the samples of atmosphere and location of monitoring stations
- vi) Air quality – Vehicular exhaust emission limits international/regional participation/voting/balloting

Destruction of used undergarments in Ruvuma.

e) Electrical Engineering

- i) Household and similar electrical appliances – Safety – Part 2-3: Particular requirements for electric irons (TZA 448-2-8:2013 (Rev))
- ii) Switches for household and similar fixed installations – Part 2- 2: Electromagnetic remote-control switches (RCS)
- iii) Codes of practice for electrical installation
- iv) Edison screw lamp holders
- v) Uninterruptable power systems (UPS)-Part 2: Electromagnetic compatibility (EMC) requirements (IEC 62040-2:2016)
- vi) Photovoltaic inverters – Data sheet and name plate
- vii) High-voltage fuses – Part 1: current-limiting fuses
- viii) Low-voltage switchgear and control gear – Part 2: Circuit-breakers

f) General techniques

- i) Blow moulded polyolefin containers – Part 1: Up to 5 litres capacity
- ii) Blow moulded polyolefin containers – Part 3: Over 60 litres up to and including 200 litres capacity
- iii) Tourism and related services – Sustainability management system for accommodation establishments – Requirements {ISO 21401:2018}
- iv) Adventure tourism – Good practices for sustainability – Requirements and recommendations {ISO 20611:2018}
- v) Flexible plastic packages – Specification
- vi) Blow moulded polyolefin containers – Part 3: Over 60 litres up to and including 200 litres capacity
- vii) Quality management system – Guidelines for the quality management in projects
- viii) Quality management – Guidelines for quality plans
- ix) Conformity assessment – Vocabulary and general principles
- x) Guidelines for quality management system documentation

g) Building and construction

- i) Drinking water supply and wastewater systems
- ii) Road vehicles – Vehicle identification number (VIN) – Content and structure
- iii) Density and void content
- iv) Infiltration rate
- v) Density and void content
- vi) Specification for plain and decorative linoleum
- vii) Determination of creep of concrete cylinders in compression
- viii) Ceramic tiles – Guidelines for installation – Part 2: Installation of thin ceramic wall and floor tiles and panels
- ix) Window and door frames for external use – Part 1: PVC-U profiles for window and door frames
- x) Window and door frames for external use - Part 2: Windows with frames made from PVC-U profiles

TBS Inspector inspects steel bars during a market surveillance inspection in Morogoro

h) Mining

- i) Coal reserves and resources estimation
- ii) Ventilation in underground mines – Part 1: Air quality requirement
- iii) Rock drilling equipment – Hollow drill steels in bar form hexagonal and round
- iv) Rock drilling equipment – Forged collared shanks and corresponding chuck bushings for hollow hexagonal drill steels
- v) Solid mineral fuels – Determination of phosphorus content – Reduced molybdophosphate photometric method
- vi) Coal – Determination of bulk density for the use in charging of coke ovens
- vii) Mineral processing terminology – Part 1: Comminution

- viii) Mineral processing terminology – Part 2: Concentration
- ix) Copper sulphide concentrates – Determination of copper – Electro gravimetric method.
- x) Ventilation in underground mines – Part 2 : General guidelines

i) Mechanical Engineering

- i) Road vehicles – World manufacturer
- ii) Stainless steel cooking utensils – Specification
- iii) Petroleum and natural gas industries – Pipeline transportation systems – Design, construction and maintenance of steel cased pipelines
- iv) Safety requirements for bicycles – Part 1: Terms and definitions
- v) Retro-reflective number plate for vehicles
- vi) Hot-rolled steel sheet of structural quality
- vi) Hot-rolled steel sheet of structural quality
- vii) Cycles – Safety requirements for bicycles – Part 5: Braking test methods
- viii) Steel tubes and fittings – Symbols for use in specifications – Part 2: Square and rectangular hollow sections
- ix) Rubber hoses and hose assemblies – Wire or \ textile-reinforced single-pressure types for hydraulic applications – Specification (rev: TZS 1636:2013)
- x) Materials and articles in contact with foodstuffs
Cutlery and table hollowware – Part 7 – Requirements for table cutlery made of silver, other precious metals and their alloys

2.2.3. New Standardization Projects Initiated

During the year 2019/2020, the Bureau initiated a total of 243 new standardization projects. New standardization projects initiated during the year include household and similar electrical appliances – Safety – Part 2-3: Particular requirements for electric irons, low-voltage switchgear and control gear assemblies – Part 2: Power switchgear and control gear assemblies, specification and test methods (ISO 7701:1994), code of practice for the prevention and reduction of dioxin-like PCBs and non-dioxin-like PCBs in food and feed, guidelines for the selection of quality management system consultants and use of their service (ISO 10019:2005), determination of silver and gold contents – Fire assay and flame atomic absorption spectrometric method using scarification or cupellation, requirements and test methods and jointing materials for gypsum plasterboards – definitions.

Other projects initiated were dried peaches – specification and test methods ISO 7703:1995, microbiology of the food chain – carcass sampling for microbiological analysis, production and handling of cassava – good agricultural practices, dried lemon grass leaves – specification, meat and meat products – measurement of pH – reference method, Livingstone potato (numbu/ming’oko) – specification and steel for the reinforcement of concrete – part 4: ribbed bars – low grade steel.

Equipment calibration in the TBS Metrology Laboratory

TBS Director General Dr. Athuman Y. Ngenya officially opens a stakeholders’ conference on steel bars at TBS headquarters in Dar es Salaam.

2.2.4. Regional and International Standards Work

TBS participated in both regional and international standardization activities during the period under review. Various meetings were held in the country, region and across the continent.

TBS attended ISO Working Group meeting on Data Management and Interchange (ISO/IEC JTC 1/SC 32/WG 03) which was conducted in Arusha. The meeting was attended by the delegation from America, Asia and Europe from 2019-09-23 to 2019-09-27. TBS, through standards directorate also attended ISO TC 82 meeting in Stockholm, Sweden from 2019-09-22 to 2019-09-27.

From 2019-11-05 to 2019-11-08, TBS through the Textile and Leather Section participated in ARSO THC 07 – Textile and leather products harmonization meeting and the following standards were discussed:

- a) FD-ARS 653:2019, Textiles – Disposable sanitary towels – Specification
- b) FD-ARS 1575:2019, Textiles – Reusable sanitary towels – Specification
- c) FD-ARS 1572:2019, Textiles – Disposable adult diapers – Specification
- d) FD-ARS 658-1:2019, Textiles – Socks – Part 1: Men's and women's socks – Specification
- e) FD-ARS 658-2:2019, Textiles – Socks – Part 2: Sports socks – Specification

- f) FD-ARS 1569:2019, Labelling and marking of textiles and household textile articles
- g) FD-ARS 1570:2019, Printed labels for textiles
- h) FD-ARS 1571:2019, Textiles – Woven sacks for packing cement
- i) FD-ARS 1573:2019, Textiles – Woven cotton and similar household fabrics and articles
- j) FD-ARS 1574:2019, General requirements for woven textile piece goods and household articles

On 2019-12-16, the Food and Agriculture Section circulated the following 6 draft East African Standards under EASC /TC025 Processed fruits, vegetables and tubers to partner states secretaries for national consultation:

- a) CD/025/xx:2019 Processed cultivated edible mushroom
- b) CD/025/xx:2019 Pumpkin flour – Specification
- c) CD/025/xx:2019 Canned mixed vegetable – Specification
- d) CD/025/xx:2019 Canned fruit cocktail – Specification
- e) CD/025/xx:2019 Dried edible fungus – Specification
- f) EAS 66 Part 4 revision

The Minister for Industry and Trade, Hon. Innocent Bashungwa (gesturing) chats with the TBS Director General (second right) after inspecting the construction of the TBS Test House at TBS headquarters in Dar es Salaam.

From 13/01/2020 to 17/01/2020 TBS through the Mechanical Engineering Section conducted editing meeting under EASC/TC 041 Transportation of dangerous goods. The following standards were discussed:

- a) DEAS 949:2019 Transport of dangerous goods -Identification and classification of dangerous goods for road and rail transport
- b) DEAS 950:2019 Transport of dangerous goods -Operational requirements for road vehicles
- c) DEAS 951:2019 Transport of dangerous goods -Packaging and large packaging for road and rail transport
- d) DEAS 952-1:2019 Transport of dangerous goods -Emergency information systems – Part 1: Emergency information system for road transport
- e) DEAS 952-4:2019 Transport of dangerous goods -Emergency information systems – Part 4: Transport emergency card

From 19th to 25th January, 2020, TBS through the Building and Construction Section attended regional editing meeting under EASC/TC 043 Road, rail, air and water transport in Rwanda. The following East African draft standards were edited and finalized:

- a) FEAS 981:2019 Hydraulic road binders – Specification
- b) FEAS 982-1: 2019 Bitumen and bituminous binders – Part 1: Penetration grade bitumen – Specification
- c) FEAS 982-2: 2019 Bitumen and bituminous binders – Part 2: Cutback bitumen – Specification

In additional, Bureau attended the 8th SMC meeting held on 27th April, 2020 through zoom, the meeting among others, approved new work items of technical committees to progress, considered the Regional Standardization Plan for consideration by the EASC and handled over to new SMC leadership (Uganda – Chairperson and Tanzania – Secretary). Moreover, TBS coordinated and attended the SADCTBT expert group meeting held on 21st April via Video Conferencing from Julius Nyerere Conference (JNICC), Dar es Salaam. Eleven (11) SADC member states attended the meeting. It was an annual meeting, which deliberated on a number of issues regarding the Standardization, Quality Assurance and Metrology (SQAM).

2.3. Standards Implementation

2.3.1. Certification

Throughout the year 2019/2020, TBS granted 534 standards mark licences/tested product certificates/licence extensions. The performance was 148.3 percent compared to the annual target of 360 standards mark licences/tested product certificates/licence extensions during the year.

2.3.2 Technical assistance to exporters

For the duration of the Financial Year 2019/2020, the Bureau continued to provide services to Tanzanian exporters. In total, 58 pre-export certificates were issued to exporters of various products. The performance was 322.2 percent compared to the annual target of 18 certificates.

2.3.3.Imports

During the period under review, a total of batch certificates issued under PVoC were 32,259 CoCs. This is equivalent to 84.9 percent compared to the annual target of 38,000 CoCs.

On the other hand, 41,616 vehicles were inspected during the year 2019/2020 compared to the annual target of 41,000 vehicles, which is equivalent to 101.5 percent.

2.3.4.Quality Control Training

For the period of the Financial Year 2019/2020, the number of training seminars in quality assurance/management amounted to 100 against the projected figure of 90 equivalents to 111.1 percent.

2.4. Testing and Calibration

The Testing and Calibration Directorate continued to provide testing and calibration services to Tanzanian industrialists.

During the Financial year 2019/2020, the Bureau tested a total of 25,339 samples equivalent to 110.2 percent of the annual target of testing 23,000 samples. Likewise, a total of 9,125 equipment were calibrated which is equal to 121.7 percent of the annual target of calibrating 7,500 equipment. This sums up to a total of 34,464 samples tested and equipment calibrated in the year under review, which is equivalent to 113.0 percent of annual target of the testing and calibration of 30,500 samples and equipment.

2.5. Information Centre

During the period under review a total of 325 finalized Tanzania standards were edited, formatted and documented. Other activities performed include editing contents of TBS website and other official documents (i.e. outgoing letters), duplication, binding and lamination of various office documents, securing and maintaining TBS ICT infrastructure i.e. server rooms, internet links, internal networks, remote connectivity, and security data and systems at TBS headquarters, import inspection at zone and border offices, managing the on-going TBS ICT projects i.e. development of i-SQMT system, TBS e-learning portal, development of online application system (OAS), server rooms upgrading and web store system (online sales of standards). The other activities were provision of technical specifications when acquiring ICT software and hardware, supervised installation of the call centre system under the contracted firm (SIHEBS Company Limited), and internet backup link at TBS headquarters office and imports inspection office, supervision of user acceptance test (UAT) of TBS online application system (OAS), managing existing management information system (MIS) i.e. online application system (OAS), and quality management information system (Qualimis), safari portal, TBS electronic payment system (ePS), Microsoft Dynamics NAVISION, domain controllers (active directory), e-SCAN antivirus, NVR system for CCTV cameras, TBS online forum for TBS Board of Directors (e-Board), attendance register system (biometric machines), backup system, content management system (CMS) for TBS website and government mailing system (GMS). Others were processing and sending notifications of new national standards to World Trade Organization (WTO) through national notification agency (NNA),

Ministry of Industry and Trade, receiving and processing inquiries on standards and standards related information; selling national standards and international standards to manufacturers, importers, regulators and researchers. During the year under review, TBS sold a total of 1,483 standards whereby 1,436 were national standards and 47 international standards.

2.6. Financial Performance

2.6.1. Long Term Liability

As at 30th June 2020, TBS had no long-term liability.

2.6.2. Balance sheet

During the financial year 2019/2020, TBS net current assets decreased by 52.8 percent from TZS 16,058.3 million in 2018/2019 to TZS 7,577.10 million. Likewise, during the year under review TBS net worth increased by 3.3 percent from TZS 72,290.2 million recorded in 2018/2019 to TZS 74,705.2 million as at 30th June 2020.

Table 3: Summary of assets and liabilities (TZS mil.) as at 30th June 2020

YEAR	CURRENT ASSETS	CURRENT LIABILITIES	NET CURRENT ASSETS	NET WORTH
1998/1999	174.4	176.0	(1.6)	329.3
1999/2000	133.5	87.0	46.5	656.3

2007/2008	2,292.5	267.7	2,024.9	7,997.8
2008/2009	3,482.6	670.1	2,812.5	8,813.5
2009/2010	3,676.8	429.5	3,247.3	9,431.0
2010/2011	6,906.6	219.2	6,687.3	12,401.9
2011/2012	8,814.9	735.6	8,079.3	33,348.4
2012/2013	9,218.5	512.9	8,705.6	34,867.5
2013/2014	10,068.6	858.6	9,210	39,684.1
2014/2015	12,256.3	933.3	11,323	42,634.5
2015/2016	18,379.4	698.4	17,681.1	61,876.3
2016/2017	19,608.7	2,551.2	17,057.6	64,204.2
2017/2018	19,703.9	1,722.7	17,981.2	67,515.6
2018/2019	21,795.2	5,736.9	16,058.3	72,290.2
2019/2020	16,484.0	8,906.9	7,577.10	74,705.2

2.6.3. Surplus/deficit

During the financial year ended 30th June 2020, TBS recorded a net surplus of TZS 3,811.1 million compared to net surplus of 4,620.5 million recorded in the previous year. Hence, an accumulated surplus in 2019/2020 was TZS 74,673.4 million compared to the accumulated surplus of TZS 72,258.4 million recorded during the year 2018/2019. The increase in accumulated surplus was due to the Accountant General's directives through Circular No.2 of 2018 that all non-current assets of public institutions' accounts of revaluation reserve should be closed and the running balance be transferred to accumulated surplus.

2.6.4. Income

The major sources of TBS income during the year under review continued to be internally generated income, Government subvention and support from Development Partners.

2.6.4.1. Government subvention

Government subvention increased by 36.9 percent from TZS 8,667.0 million in 2018/2019 to TZS 11,387 million in 2019/2020. The increase in government subvention was mainly due to increased number of new staff through recruitment and transfers from other public institutions.

Government subvention accounted for 18.5 percent of TBS total income, and was used for personnel emoluments.

2.6.4.2. Internally generated funds

During the year under review, TBS internally generated income increased by 0.9 percent, from TZS 46,401.0 million in 2018/2019 to TZS 46,822.9 million in 2019/2020, accounting for 76.3 percent of total income.

2.6.4.3. Development Partners

The value of products and services acquired by the Bureau through TMEA project is TZS 2,047.4 million.

2.6.5. Operating costs

The operating costs increased from TZS 35,534.3 million in 2018/2019 to TZS 37,590.6 million in 2019/2020. The amounts do not include 15 percent remittance of internal revenues to the government during the respective financial years. An operating surplus of TZS 10,475.5 million was recorded in 2019/2020 compared to TZS 12,585.6 million which was recorded in 2018/2019. The figures were recorded before 70 percent appropriation of annual surplus for remittance to the government.

2.6.6. Remittance to the Government

During the year under review, TBS remitted to the government a total of TZS 7,023.1 million as 15 percent of internal revenues. From the annual/operating surplus, a total of TZS 6,664.3 equivalent to 70 percent of the annual surplus was transferred by the Bureau to the government as excess capital. Hence, the net operating surplus was TZS 3,811.1.

2.6.7. Prospects

TBS continues to strengthen service provision to ensure customer satisfaction. Internal revenue collection mechanism has improved to enable the Bureau to invest in the state-of-the-art equipment.

The financial year 2019/2020 marked a bright future in the Bureau as amendments on the Finance Act of 2019 provided TBS with the responsibility of regulating quality and safety of food and cosmetic products and their premises.

From the external side, TBS continues to maintain stable relationship with development partners. The Bureau has acquired laboratory equipment and ICT infrastructure through projects sponsored by development partners.

2.7. Human Resources Development and Staff Welfare

During the period under review, nine (9) senior officers were appointed to head directorates and departments as per the new organization structure of November 2018. A total number of fifteen (15) contract employees (previously recruited by TFDA) reported to TBS whereby fourteen (14) employees were allocated to the Directorate of Quality Management (DQM) and one (1) employee was allocated to the Directorate of Testing and Metrology (DTM). The Bureau received thirty-nine (39) employees transferred from other government institutions to TBS as replacement of employees who left the Bureau for various reasons. 88 employees were transferred from TMDA for the implementation of changes introduced under the Finance Act of 2019, four (4) TBS employees were transferred to other Government institutions (SUA, TPA & NIT); and internal transfers were done to 20 TBS employees, transferred from one directorate, section or zone to another.

During the period under review, the Bureau continued to enhance human resource development through provision of short courses and long courses in line with the training needs collected from directorates. Hence, the Bureau offered and supported a total of 30 different short courses to 107 employees sponsored by the Bureau and other donors; a total number of twenty-eight (28) different long-term training to TBS employees sponsored by the Bureau; a total number of eleven (11) different long-term training to TBS employees sponsored by development partners; and a total number of eight (8) different long-term training to TBS employees with self-sponsorship.

With regard to staff welfare, the Bureau continued to provide for subsidized meals (paid lunch and tea) to all employees during working days and medical facilities in compliance with the NHIF Act No. 8 of 1999 (Cap 395 R.E 2002). All staff are members of the National Health Insurance Fund (NHIF) where medical costs are covered under this scheme. Only health services which are not covered by NHIF are covered by the Bureau. The Bureau's safety management system delivers a safe working environment by continuous and effective assessment. Additionally, the relationship between the Bureau and its employees continued to stabilize.

2.8. PLANNED ACTIVITIES

During the period under review, the Bureau's planned activities which were drawn from the 2016/17 – 2020/21 Strategic Plan, Standards Act No. 2 of 2009, National Plan and Budget Guidelines, Vision 2025, FYDP II and Sector Policies (SMEs, Trade, Industrial) included continuation of standards formulation; strengthening metrology and calibration services especially in medical equipment and infrastructure equipment (e.g. roads equipment); strengthening product and system certification services; reviving the solar pickle laboratory, and taking advantage to pursue solar equipment testing to boost the Bureau's revenue; construction of Viwango House in Dodoma; expanding TBS services through construction of zonal laboratories; and purchasing equipment for expansion of scopes and maintenance of accreditation.

TBS is among the key institutions contributing to trade facilitation in Tanzania. As one of the country's regulatory bodies, the Bureau has to prioritize advance of efficiency in service delivery in order to encourage favorable business environment.

Furthermore, TBS will continue with efforts to strengthen international cooperation on standardization, quality assurance and metrology services. Through increased number of standards harmonization, the scope of regional and international trade will be increased.

Also, TBS will stimulate the development of demand driven standards. New products are introduced in the market, thus the Bureau will ensure that appropriate standards for all local products are developed. Capacity building to MSMEs in domestic and international markets on standards will be promoted.

The Director of Testing and Metrology, Eng. Johanes Maganga (right) receives the key of the new TBS Test House building from Mr. Dhiresch Buchesha, the representative of the main contractor, after completion of the construction work.

REPORTS OF THE AUDITORS

4.0 INDEPENDENT REPORT OF THE CONTROLLER AND AUDITOR GENERAL

The Chairman of the Board,
Tanzania Bureau of Standards,
P. O. Box 9524,
DAR ES SALAAM.

4.1 REPORT ON THE AUDIT OF FINANCIAL STATEMENTS

Opinion

I have audited the financial statements of Tanzania Bureau of Standards, which comprise the statement of financial position as at 30th June, 2020, and the statement of financial performance, statement of changes in net assets and cash flow statement and the statement of comparison of budget and actual amounts for the year then ended, as well as the notes to the financial statements, including a summary of significant accounting policies.

In my opinion, the accompanying financial statements present fairly in all material respects, the financial position of Tanzania Bureau of Standards as at 30th June, 2020, and its financial performance and its cash flows for the year then ended in accordance with International Public Sector Accounting Standards (IPSAS) Accrual basis of accounting and in the manner required by the Public Finance Act, 2001 (Revised 2004).

Basis for Opinion

I conducted my audit in accordance with International Standards of Supreme Audit Institutions (ISSAI). My responsibilities under those standards are further described in the sections below entitled “Responsibilities of the Controller and Auditor General for the audit of the Audit of the financial statements”. I am independent of Tanzania Bureau of Standards in accordance with the International Ethics Standards Board for Accountants’ Code of Ethics for Professional Accountants (IESBA Code) together with the National Board of Accountants and Auditors (NBAA) Code of Ethics, and I have fulfilled my other ethical responsibilities in accordance with these requirements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Emphasis of Matter

I draw attention to the matter below. My opinion is not modified in respect of this matter.

Note 18 to the financial statements indicates that TBS has three pending undecided legal cases that claim compensation from TBS. The ultimate outcome of the cases

cannot presently be determined, and no provision for any liability that may result has been made in the financial statements. Further, the initial estimates have increased from TZS 2.673 billion which were disclosed in 2018/19 to TZS 7.259 billion in the current year which may be payable if the cases will be ruled in favour of the plaintiffs.

Key Audit Matters

Key audit matters are those matters that, in my professional judgment, were of most significance in my audit of the financial statements of the current period. I have determined that there are no key audit matters to communicate in my report.

Other Information

Management is responsible for the other information. The other information comprises the Director's Report and the Declaration by the Head of Finance but does not include the financial statements and my audit report thereon.

My opinion on the financial statements does not cover the other information and I do not express any form of assurance conclusion thereon. In connection with my audit of the financial statements, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work I have performed on the other information that I obtained prior to the date of this audit report, I conclude that there is a material misstatement of this other information; I am required to report that fact. I have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IPSAS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the entity's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the entity or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the entity's financial reporting process.

Responsibilities of the Controller and Auditor General for the Audit of the Financial Statements

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes my opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISSAI will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISSAI, I exercise professional judgment and maintain professional skepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my audit report. However, future events or conditions may cause the entity to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide those charged with governance with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, I determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. I describe these matters in my audit report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

In addition, Section 10 (2) of the Public Audit Act, 2008 requires me to satisfy myself that, the accounts have been prepared in accordance with the appropriate accounting standards.

Further, Section 48(3) of the Public Procurement Act, 2011 (as amended in 2016) requires me to state in my annual audit report whether or not the audited entity has complied with the procedures prescribed in the Procurement Act and its Regulations.

4.2 REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

Compliance with the Public Procurement Act, No.7 of 2011 (as amended in 2016)

In view of my responsibility on the procurement legislation and taking into consideration the procurement transactions and processes I have reviewed as part of this audit, I state that, Tanzania Bureau of Standards procurement transactions and processes have generally complied with the requirements of the Public Procurement Act No.7 of 2011 (as amended in 2016) and its underlying Regulations of 2013 (as amended in 2016).

Charles E. Kichere
Controller and Auditor General
Dodoma, United Republic of Tanzania

NOTES TO THE VARIANCES ON STATEMENT OF COMPARISON OF BUDGET AND
ACTUAL AMOUNTS

- (a) Variation of 11% refers to undisbursed amount relating to salaries and pension contributions for non-issued expected employment permit during the financial year ended 30th June, 2020.
- (b) The budget line spent below the expectation by 25% due to the fact that, during the COVID 19 pandemic some of the activities were seized as measure of preventing spread of Covid-19.
- (c) The budget item spent above the target during the year under review by 41 % for the reason the expenditure included amount used to procure Covid -19 spread prevention items/facilities.
- (d) Variation of 26% refers to unpaid amount relating to salaries and pension contributions for new expected employees. Also partial implementation of new organization structure contributed to the variance for unpaid entitlements. It is to be noted during the financial year ended 30th June, 2020 there was no new recruits but the Bureau received 111 employees who were transferred from other Government institutions.
- (e) The amount of audit fee will be paid in the financial year ending 30th June, 2021, 100% amount committed.
- (f) The 100% variation of is due non- existence of Board of Directors during the Financial year under review.
- (g) The 100% budget variation is due non- existence of Board of Directors meetings during the Financial year under review.
- (h) The variance of 26% contribution to GVT consolidated fund is due to variance on amount collected from own source being less than budgeted amount following outbreak of Covid-19.

NOTES TO ACCOUNTS

NOTES TO THE FINANCIAL STATEMENTS

1.0 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

GENERAL INFORMATION

Headquarters Office,
P.O BOX 9524,
Sam Nujoma Road/Morogoro Road
Ubungo, Dar es Salaam

1.1 Basis of preparation

The financial statements of the Bureau have been prepared in accordance with the International Public Sector Accounting Standards (IPSAS) Accrual Basis and its interpretations adopted by the International Public Sector Accounting Board (IPSAB). The financial statements have been prepared under the historical cost convention except where otherwise stated in the accounting policies below.

The areas involving a higher degree of judgment or complexity, or where assumptions and estimates are significant to the financial statements, are separately disclosed in a Note to Financial Statement.

1.2 Revenue Recognition

Revenue comprises of the fair value of subvention and assistances received from the Central Government and other Donors, fees charged on various services rendered to the customers (which include certification, testing, quality control, consultancy etc. as well as rent and interest net of withholding tax and discounts.

Revenue is recognized to the extent that it is probable that economic benefits will flow to the Bureau and the revenue can be reliably measured.

(a) Subvention and Assistances

Subvention and assistances received from the Government and other Donors are recognized when earned by the Bureau.

(b) Fees on Services Rendered

Fees on services rendered to the customers are recognized in the accounting period in which the services are rendered, by reference to the completion of the specific transaction, assessed on the basis of actual service provided.

(c) Rent Income

Rent income is mainly from the rented properties to the third party such as cellular towers. Rent income is recognized on time proportion basis when earned and accounted in the respective accounting period.

1.3 Property, Plant and Equipment (PPE)

Plant, Property, and Equipment are initially recorded at historical cost which includes expenditure that is directly attributable to the acquisition of the item. Subsequently, Plant Property, and Equipment were reviewed and are shown at reviewed amounts, less accumulated depreciation. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate only when it is probable that the future economic benefits or service potential associated with the item will flow to the Bureau and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the statement of financial performance during the financial year in which they are incurred.

All PPEs which are under progress such as construction are disclosed separately under name of Capital Work in Progress in the statement of financial position.

Increases in the useful life arising on reviewing the useful life of plant, property, and Equipment resulting into decrease in depreciation charge and finally affect shareholders' equity through Surplus. Decrease in useful life of an item of PPE would result into increase in depreciation charges which are to be charged to the statement of financial performance and has negative impact to the financial statements.

(a) Depreciation

Land is not depreciated. Depreciation on plant, property, and Equipment is calculated on the following basis.

Depreciation is calculated to write off the cost/value of plant, property and equipment over their expected used life time on a straight line basis. Depreciation rates applied during the year.

Category of PPE	Rate %
Land Development	-
Buildings	2
Motor vehicles	20
Motor Cycle	14
Office and Residential Equipment's	20
Office and Residential Furniture	20
Computers	25
EDP software	33
Electrical Generator and water pump	6.75
Loose tools	50

Depreciation is charged on assets from the year when they are first put into use and stop on the date when the asset is derecognized or disposed of by the Bureau.

(b) Major renovations

Major renovations are depreciated over the remaining useful life of the related asset or to the date of the next major renovation, whichever is sooner.

(c) An Asset's Carrying Amount and Residual Value

An asset's carrying amount is written down immediately to its recoverable amount when there is strong evidence the carrying amount is greater than its estimated recoverable amount. Likewise, the asset's residual values and useful lives are reviewed only when the condition to warrant the review exist at the balance sheet date.

(d) Gains and Losses on Disposal

Gains and Losses on disposal can be determined when the carrying value of an asset is below or above the net realizable value.

1.4 Inventories

Inventories are valued at the lower of cost and Current replacement cost.

Deposits, prepayments and receivables are recognized initially at fair value and subsequently measured at amortized cost net of provision for impairment.

1.5 Provision for Impairment

Provision for impairment of receivables when there is objective evidence that the Bureau will not be able to collect all amounts due according to the original terms of the specific receivables. The loss is recognized through the statement of financial performance.

1.6 Foreign Currency Translations

(a) Functional and Presentation

Item included in the financial statements of the Bureau are measured using Tanzanian Shilling (TZS), which is the currency of the primary economic environment in which the Bureau operates (**Presentation Currency**).

(b) Transaction and Balances

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the date of the transactions. Monetary assets and liabilities at the year ended expressed in foreign currencies are translated into functional currency using the exchange rates prevailing at the end of the financial

year; 30th, June each year using the BOT mid-rate. Translation losses/ (gains) of loans used to finance capital construction projects are capitalized as part of construction work in progress. All other exchange gains and losses are reflected in the statement of financial performance.

1.7 Cash and Cash Equivalent

Cash and cash equivalent are carried out in the statement of financial position at cost. For the purpose of cash flow statement, cash and cash equivalent comprise cash in hand and cash at bank.

1.8 Capital Fund

Capital Fund is made up of the Government contribution to the establishment of the Bureau.

1.9 Amortization of Grants

It is the Bureau's policy to recognize capital grant at once (Income Method) as per IPSAS 23 and continue to charge depreciation based on the respective plant, property, and equipment over the expected useful life of the asset.

1.10 Trade and other payables

Payables are recognized at fair value. Other payables are recognized when incurred through either enjoyment of services on credit and /or receiving of goods supplied on credit.

1.11 Financial Risk Management

The overall risk management focuses on the unpredictable financial markets and it aimed at minimizing potential adverse effects on the Bureau's financial performance. The role of the Bureau's risk management is primarily vested in the Accounts Section under the guidance of the Board of Directors. The specific risk management policies of the Bureau are as follows:

(a) Liquidity Risk

The Bureau had a prudent liquidity risk management through maintaining sufficient cash to cover committed credit facilities and working capital requirements.

(b) Credit Risk Management

The potential credit risk involves receivables which are managed as short term credit. The Bureau deposits her short term cash surpluses with Bank of Tanzania (BOT).

(c) Receivables

Customers subjected to use services of the Bureau are required to pay in cash for services rendered to them. Some customers assessed to be credit worth are given short term credit facilities which they are required to settle through normal business transactions by raising invoices as per receivable policy of 2018.

(d) Foreign currency Risk

Foreign currency risk is managed at an operational level and it is monitored by Accounts Section. Losses arising from foreign currency liabilities are managed through timely payment of outstanding liabilities.

(e) Employee Benefits

Apart from monthly salaries, risk allowance, and other fringe benefits as provided in the staff and administrative regulations; the Bureau have a defined contribution plans to cater for pension obligations for her employees by paying on monthly basis the agreed contributions to the Pension Funds. Since staff salaries are paid by the Treasury Such employer pension contributions part are being paid by the Ministry of Finance and Planning (the Treasury) directly to pension fund on monthly basis.

(f) Gratuity/Bonus Scheme

TBS employees who are on contract terms are entitled to gratuity at the rate specified in their contract and this is paid on satisfactory payable in accordance with the terms completion of the contract or leaving the service under circumstances in which gratuity is paid as 25% of the basic salaries for the total of the contract Employees on permanent terms who qualify for bonus of complete years served for the Bureau. Average basic salary in the last four years is used in calculating the bonus. Employees who are terminated on disciplinary.

1.12 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimate and judgements are continually evaluated and are based on historical experience and in the process of applying the Bureau's accounting policies, Management has to make judgements in determining whether assets are being impaired or not.

16.0 PRIOR YEAR ADJUSTMENT

- (a) TZS 1,056,198,589 was overpaid to Treasury Registrar (TR) in respect of Excess capital, hence reduced the 15% contribution payable to Treasury Registrar. In writing Treasury Registrar directed the Bureau to recognize the amount as Corporate Social Responsibility to Government where by prior year adjustment has been done affecting Payables and accumulated surplus.
- (b) TZS 20,500,000 which was erroneously double charged on BoD's fee in Financial Statements of 2018/2019 which created payable adjustment and so affected payable and accumulated surplus.
- (c) TZS 14,860,266 double invoice on revenue following system error. Adjustment was done and so affected receivables and accumulated surplus.
- (d) TZS 301,289,625 Double recognition of revenue through Invoice and receipts. Correction of error has done affecting Revenue, Receivable and surplus.
- (e) TZS 65,222,908 double charge for Computer depreciation, prior year adjustment has been done affecting PPE (Computer) and Accumulated surplus.

ACCUMULATED SURPLUS PRIOR YEAR ADJUSTMENT

Overpaid Excess capital	(1,056,198,589)
Overcharged Computer depreciation	65,222,908
	(990,975,681)

NET SURPLUS PRIOR YEAR ADJUSTMENT
