

## DRAFT TANZANIA STANDARD

---

### Testing of concrete —Part 3: Making and curing test specimens

**TANZANIA BUREAU OF STANDARDS**

---

## 0.National foreword

The Tanzania Bureau of standards is the statutory national standards body for Tanzania, established under the act.No.3 of 1975, amended by act.No.2 of 2009

This finalized Tanzania standard is being prepared by Aggregates, Sand and Concrete Technical Committee (BCDC1), under the supervision of the Building and Construction Divisional Standards Committee (BCDC)

This Draft Tanzania Standard is identical adoption of **ISO 1920-3:2019 Testing of concrete —Part 3: Making and curing test specimens**, published by the International Organization for Standardization (ISO).

### Terminologies and conventions

The text of the International standard is hereby being recommended for adoption without deviation for publication as draft Tanzania standard.

Some terminologies and certain conventions are not identical with those used as Tanzania standards; attention is drawn to the following:

The comma has been used as a decimal marker for metric dimensions. In Tanzania, it is current practice to use a full point on the baseline as the decimal marker.

Wherever the words “International Standard” appear, referring to this standard, they should read as “Tanzania Standard”.
