

## **DRAFT TANZANIA STANDARD**

---

**Tissue paper and tissue products - Part 3: Determination of thickness, bulking thickness and apparent bulk density and bulk.**

For Stakeholder's Comments Only

**TANZANIA BUREAU OF STANDARDS**

---

# **CDC 10 (1447) DTZS / ISO 12625-3:2014 Tissue paper and tissue products - Part 3: Determination of thickness, bulking thickness and apparent bulk density and bulk.**

## **National Foreword**

Tanzania Bureau of Standards (TBS) is a sole National Standards body, established by the Standards Act No. 2 of 2009. It is mandated, among other functions, with formulation of National Standards in all products.

This Draft Tanzania Standard is being prepared by Stationery and Paper Products Technical Committee under the supervision of Chemical Divisional Standards Committee.

This Draft Tanzania Standard is identical to ISO 12625-3:2014 Tissue paper and tissue products - Part 3: Determination of thickness, bulking thickness and apparent bulk density and bulk.

## **Terminology and conventions**

The text of the international standard is hereby being recommended for approval without deviation for publication as draft Tanzania standard.

Some terminology and certain conventions are not identical with those used as Tanzania standard; attention is drawn especially to the following;

The coma (,) has been used as a decimal marker (.) for metric dimension. In Tanzania, its current practice to use a full point on the baseline as decimal marker.

Wherever the words “International Standard” appears in the text, referring to this standard, they should be read as “Tanzania Standard”.

## **Scope**

This part of ISO 12625 specifies a test method for the determination of thickness and bulking thickness and the calculation of apparent bulk density and bulk of tissue papers and tissue products under a pressure of 2,0 kPa.
