IEC 61400-14: 2005

DRAFT TANZANIA STANDARD

(Draft for comments only)

Wind turbines - Part 14: Declaration of apparent sound power level and tonality values

Draft for Stakeholders Comments

TANZANIA BUREAU OF STANDARDS

1. National Foreword

This draft Tanzania Standard is being prepared by the Renewable Energy Technical Committee, under the supervision of the Electrotechnical Divisional Standards Committee (EDC)

This draft Tanzania Standard is an adoption of the International Standard **IEC 61400-14:2005**, *Wind turbines - Part 14: Declaration of apparent sound power level and tonality values*, which has been prepared by the International Electrotechnical Commission (IEC).

2. Terminology and conventions

Some terminologies and certain conventions are not identical with those used in Tanzania Standards; Attention is drawn especially to the following:

- 1) The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, it is current practice to use “full point” on the baseline as the decimal marker.
- 2) Where the words “International Standard(s)” appear, referring to this standard they should read “Tanzania Standard(s)”.

Draft for Stakeholders Comment

3. Scope

This draft Tanzania standard gives guidelines for declaring the apparent sound power level and tonality of a batch of wind turbines. The measurement procedures for apparent sound power level and tonality are defined other standards.
