

**DRAFT TANZANIA STANDARD**

---

**Plastics-Symbols and abbreviated terms part 2: Fillers and reinforcing materials**

**TANZANIA BUREAU OF STANDARDS**

---

## National foreword

The Tanzania Bureau of Standards is the statutory National standards body for Tanzania, established under the Act.No.3 of 1975, amended by Act.No.2 of 2009.

This Draft Tanzania Standard is being adopted by Plastic and Plastic Products Technical Committee under the supervision of the Chemicals Divisional Standards Committee.

This draft Tanzania Standard is the identical adoption of ISO 1043-2:2011 Plastics-Symbols and abbreviated terms part 2: Fillers and reinforcing materials

The text of the International standard is hereby being recommended for approval without deviation for publication as draft Tanzania standard.

## Terminology and conventions

Some terminologies and certain conventions are not identical with those used as Tanzania standards; attention is drawn especially to the following: -

The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, its current practice to use full point on the baseline as the decimal marker.

Where the words “International Standard(s)” appear, referring to this standard they should read “Tanzania Standard”.

## Scope

This part of ISO 1043 specifies uniform symbols for terms referring to fillers and reinforcing materials. It includes only those symbols that have come into established use, and its main aim is both to prevent the occurrence of more than one symbol for given filler or reinforcing material and to prevent a given symbol being interpreted in more than one way.

NOTE For symbols and abbreviated terms for basic polymers and their special characteristics, see ISO 1043-1, for plasticizers see ISO 1043-3, and, for flame retardants, see ISO 1043-4.
