

## **DRAFT TANZANIA STANDARD**

---

**Animal and vegetable fats and oils — Determination of residual technical hexane content**

Draft for stakeholders comments

**TANZANIA BUREAU OF STANDARDS**

## **0 NATIONAL FOREWORD**

**0.1** The Tanzania Bureau of Standards is the statutory national standards body for Tanzania, established under the Act.No.3 of 1975, amended by Act.No of 2009.

This draft Tanzania standard is being prepared by the Fats and Oils Technical Committee under the supervision of the Food and Agriculture Divisional Standards Committee (AFDC).

This draft Tanzania Standard is the identical adoption of ISO 9832:2002 Animal and vegetable fats and oils — Determination of residual technical hexane content published by International Organization for Standardization.

### **0.2 Terminology and conventions.**

The text of the International standard is hereby being recommended for approval without deviation for publication as draft Tanzania standard.

Some terminology and certain conventions are not identical with those used as Tanzania Standard; attention is drawn to the following:

The comma has been used as decimal marker or metric dimensions. In Tanzania, its current practice to use a full point on the baseline as decimal marker.

Whenever the words "International Standard" appear, referring to this draft standard, they should read as "Tanzania Standard".

### **03. Scope**

This International Standard specifies a method for the determination of the residual technical hexane content of animal and vegetable fats and oils (referred to as fats hereinafter).

The method is suitable for the determination of hexane contents between 10 mg and 1 500 mg per kilogram of fat.

The method is not applicable to marine oils
