DRAFT TANZANIA STANDARD

(Draft for comments only)

**Energy management systems—Measurement and verification
of energy performance of organizations**

TANZANIA BUREAU OF STANDARDS

1 National Foreword

This draft Tanzania Standard is being prepared by the Renewable Energy Technical Committee, under the supervision of the Electrotechnical Divisional Standards Committee (EDC)

This draft Tanzania Standard is an adoption of the International Standard ISO 50015, *Energy management systems—Measurement and verification of energy performance of organizations*, which has been prepared by the International Organization for Standardization (ISO).

2 Terminology and conventions

Some terminologies and certain conventions are not identical with those used in Tanzania Standards; Attention is drawn especially to the following:

- 1) The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, it is current practice to use “full point” on the baseline as the decimal marker; and
- 2) Where the words “International Standard(s)” appear, referring to this standard they should read “Tanzania Standard(s)”.

3 Scope

This Tanzania standard establishes general principles and guidelines for the process of measurement and verification (M&V) of energy performance of an organization or its components. It can be used independently, or in conjunction with other standards or protocols, and can be applied to all types of energy.

Draft for Stakeholders comments only
