DRAFT TANZANIA STANDARD

Cigarettes - Measurement of nicotine free dry particulate matter, nicotine, water and carbon monoxide in cigarette smoke - Analysis of data from collaborative studies reporting relationships between repeatability, reproducibility and tolerances

TANZANIA BUREAU OF STANDARDS

NATIONAL FOREWORD

The Tanzania Bureau of Standards is a statutory national standards body for Tanzania established under the Act.No.3 of 1975, amended by Act.No.2 of 2009.

This draft Tanzania Standard is being prepared by the Tobacco and Tobacco products technical committee under supervision of Agriculture and Food Standards Divisional Committee (AFDC)

This draft Tanzania standard records the data and conclusions from a review of international collaborative studies to establish the tolerance for checks of the carbon monoxide yields declared by cigarette manufacturers for their products, as specified in ISO 8243.

This draft Tanzania standard is identical to the ISO 22305:2006 Cigarettes - Measurement of nicotine free dry particulate matter, nicotine, water and carbon monoxide in cigarette smoke - Analysis of data from collaborative studies reporting relationships between repeatability, reproducibility and tolerances, published by International Organization for Standardization.

TERMINOLOGY AND CONVENTIONS

This text of the international standards if found suitable, may be approved for application as a Tanzania Standard without deviations.

Some terminology and certain conventions are not identical with those used in Tanzania standards; attention is drawn especially to the following.

- 1) The comma has been used as a decimal marker for metric dimensions. In Tanzania standards, it is current practice to use a full point on the base line as the decimal marker.
- 2) Wherever the words “International Standard” appear, referring to this Standard they should read as “Tanzania Standard”.
