TEXTILE ISO STANDARDS FOR STAKEHOLDERS COMMENTS**

SN	TITLE	SCOPE
1.	ISO 858:1973 (en) Fishing nets — Designation of netting yarns in the Tex System	This International Standard specifies a method for the designation of netting yarns for fishing nets by the use of the nominal linear densities of the single yarn components or of their resultant linear density, expressed in tex.
2.	ISO 3790:1976 (en) Fishing nets — Determination of elongation of netting yarns	This International Standard specifies a method of determining the elongation of netting yarns, from packages or from netting, in their final physical state. Tests may be carried out in both the dry and wet states but tests in the wet state are considered to be particularly appropriate in indicating the behavior of the yarn in use.
3.	ISO 16663-1:2009(en) Fishing nets — Method of test for the determination of mesh size — Part 1: Opening of mesh	This part of ISO 16663 specifies a method for the determination of the size of the mesh opening of fishing nets, using an objective mesh gauge. It is applicable to active and passive fishing gear.
4.	ISO 16663-2:2003(en) Fishing nets — Method of test for the determination of mesh size — Part 2: Length of mesh	This European Standard specifies a method for the determination of mesh length of fishing nets using a ruler. It is applicable to passive fishing gears.
5	Fishing nets — Method of test for the determination of mesh size — Part 2: Length of mesh TECHNICAL CORRIGENDUM 1	This European Standard specifies a method for the determination of mesh length of fishing nets using a ruler. It is applicable to passive fishing gears.
