

## DRAFT TANZANIA STANDARD

---

**Petroleum products - Determination of particulate content of middle distillate fuels - Laboratory filtration method**

TANZANIA BUREAU OF STANDARDS

---

## National foreword

The Tanzania Bureau of Standards is the statutory National standards body for Tanzania, established under the Act.No.3 of 1975, amended by Act.No.2 of 2009.

This Draft Tanzania Standard is being adopted by Petroleum and petroleum products Technical Committee under the supervision of the Chemicals Divisional Standards Committee.

This draft Tanzania Standard is the identical adoption of ISO 15167:1999 Petroleum products - Determination of particulate content of middle distillate fuels - Laboratory filtration method

The text of the International standard is hereby being recommended for approval without deviation for publication as draft Tanzania standard.

## Terminology and conventions

Some terminologies and certain conventions are not identical with those used as Tanzania standards; attention is drawn especially to the following: -

The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, its current practice to use full point on the baseline as the decimal marker.

Where the words "International Standard(s)" appear, referring to this standard they should read "Tanzania Standard".

## Scope

This International Standard specifies a method for the determination of the particulate content of middle distillate, fuels with a closed flash point of 38 °C or higher, determined in accordance with ISO 2719, ISO 3679 or ISO 13736.

It is not applicable to light distillate fuels (gasolines) or to aviation fuels.
