

## **DRAFT TANZANIA STANDARD**

---

Starch- Determination of Ash

**TANZANIA BUREAU OF STANDARDS**

---

**First Edition**

## **NATIONAL FOREWORD**

### **1.0 INTRODUCTION**

The Tanzania Bureau of Standards is the statutory national standards body for Tanzania, established by the Act.No.3 of 1975, amended by Act.No.2 of 2009.

This standard was adopted by the Sugar and Honey Technical Committee (AFDC 17), under the supervision of the Agriculture and Food Standards Divisional Committee (AFDC).

It is the identical to ISO 3593:1981(confirmed 2021) Starch — Determination of ash, which was published by the International Organization for Standardization (ISO).

### **TERMINOLOGY AND CONVENTIONS.**

This text of International standard, if found suitable, may be approved for publication as Tanzania standard without deviations.

Some terminologies and certain conventions are not identical with those used in Tanzania standards: attention is drawn especially to the following: -

1. The comma has been used as decimal marker for Metric dimensions. In Tanzania standards, it's currently practice to use "full point" on the baseline as decimal marker.
2. Where the words "International standard (s)" appear, referring to this standard they should read "Tanzania Standard(s)".

## **SCOPE**

This Standard specifies a method for the determination of the ash yielded by starches.

The method is applicable to native starches and to modified starches yielding not more than 2 % of ash. It does not apply to hydrolysis products nor to oxidized starches, nor to other products containing more than 0,2 % of chloride expressed as sodium chloride.
