

DRAFT TANZANIA STANDARD

**Paper, board and pulps - Determination of pH of aqueous extracts - Part
1: Cold extraction**

For Stakeholders Comments Only

TANZANIA BUREAU OF STANDARDS

CDC 10 (3242) DTZS ISO 6588-1:2021

National foreword

Tanzania Bureau of Standards (TBS) is a sole National Standards body, established by the Standards Act No. 2 of 2009. It is mandated, among other functions, with formulation of National Standards in all products.

This Draft of Tanzania Standard is being prepared by Stationery and Paper Products Technical Committee under the supervision of Chemical Divisional Standards Committee.

This Draft Tanzania Standard is identical to ISO 6588-1:2021 *Paper, board and pulps - Determination of pH of aqueous extracts - Part 1: Cold extraction* published by the International Organization for Standardization (ISO).

The Draft standard is proposed for withdrawal since it is not in use and withdrawn from ISO.

Terminology and conventions

Some terminology and certain conventions in the ISO standards are not identical with those used in Tanzania Standards and attention is drawn to the following:

The comma (,) has been used as a decimal marker (.) for metric dimensions. In Tanzania Standards, it is current practice to use a full point on the base line as the decimal marker.

Wherever the words "International Standard" appear in this Tanzania Standard, they should be interpreted as "Tanzania Standard".

Scope

This document specifies a method for the determination of the pH-value defined by the electrolytes extractable by cold water from a sample of paper, board or pulp.
