National foreword

1.0 Introduction

- **1.1** This Draft Tanzania Standard is being adopted by the Leather and leather products technical committee, under the supervision of Leather Technology Division Standards Committee.
- 1.2 This Draft Tanzania Standard is identical to ISO 6941:2003 Textile fabrics Burning behavior Measurement of flame spread properties of vertically oriented specimens Published by International Organization for Standardization (ISO).
- 1.3 This Draft Tanzania Standard is the first edition.
- **1.4** The text of the International standard is hereby being recommended for approval without deviation for publication as Draft Tanzania Standard.

2.0 Terminologies and conventions

If terminologies and conventions are not identical with those used in Tanzania standards; attention is drawn especially to the following: -

The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, it is current practice to use "full point" on the baseline as the decimal marker.

Where the words "International Standard(s)" appear, referring to this Draft Tanzania standard they should read "Draft Tanzania Standard(s)".

SCOPE

This International Standard specifies a method for the measurement of flame spread times of vertically oriented textile fabrics and industrial products in the form of single or multi-component fabrics (coated, quilted, multilayered, sandwich combinations, and similar combinations) when subjected to a small, defined flame. This publication was last reviewed and confirmed in 2019
