TANZANIA STANDARD

Textile floor coverings — Burning behaviour — Tablet test at ambient temperature

Draft for Stakeholders comments only!

TANZANIA BUREAU OF STANDARDS

National foreword

1.0 Introduction

1.1 This Draft Tanzania Standard is being adopted by the Leather and Leather Products Technical Committee, under the supervision of Leather Technology Division Standards Committee.

1.2 This Draft Tanzania Standard is identical to **ISO 6925: 1982 Textile floor coverings — Burning behaviour — Tablet test at ambient temperature** (Confirmed on 2023) Published by International Organization for Standardization (ISO).

1.3 This Draft Tanzania Standard is the first edition.

1.4 The text of the International standard is hereby being recommended for approval without deviation for publication as Draft Tanzania Standard.

2.0 Terminologies and conventions

If terminologies and conventions are not identical with those used in Tanzania standards; attention is drawn especially to the following: -

The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, it is current practice to use “full point” on the baseline as the decimal marker.

Where the words “International Standard(s)” appear, referring to this Draft Tanzania standard they should read “Draft Tanzania Standard(s)”.

SCOPE

This International Standard specifies a method for the assessment of the burning behavior, often superficial, of textile floor coverings in a horizontal position when exposed to a small source of ignition under controlled laboratory conditions.

The method specified in this International Standard is applicable to all types of textile floor coverings whatever their construction or their fiber composition. The method may also be applicable to unfinished material. In this case, the result does not indicate the behavior of the material in the condition in which it is used.

The results obtained on specimens in a horizontal position, as specified in this International Standard, do not apply to the behavior of the textile floor covering when used in another position, particularly in a vertical position
