

AFDC16 (3637) DTZS/ISO 6646:2011

**DRAFT TANZANIA STANDARD**

---

**Rice — Determination of the potential milling yield from paddy and from husked rice**

,

**TANZANIA BUREAU OF STANDARDS**

---

## **0. National Foreword**

The Tanzania Bureau of Standards is the statutory national standards body for Tanzania, formally established by the Act.No.3 of 1975, which was amended and repealed by Act.No.2 of 2009.

The Cereals and Pulses Technical Committee, under the supervision of the Agriculture and Food Standards Divisional Committee (AFDC), has prepared this Tanzania Standard.

This Tanzania standard is the identical adoption to ISO 6646:2011 Rice — Determination of the potential milling yield from paddy and from husked rice, published by International Organization for Standardization (ISO).

## **Terminology and conventions**

The text of the International Standard is hereby being recommended for approval without deviation for publication as Tanzania standard.

Some terminologies and certain conventions are not identical with those used in Tanzania standards; attention is drawn to the following: -

- 1) The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, it is current practice to use “full point” on the baseline as the decimal marker.
- 2) Where the words “International Standard(s)” appear, referring to this standard they should read “Tanzania Standard(s)”.

## **1. Scope**

This International Standard specifies a laboratory method for the determination of the yield of husked rice obtained from paddy or parboiled paddy (*Oryza sativa* L.), and for the determination of the yield of milled head rice obtained from paddy or parboiled paddy, or from husked rice or husked parboiled rice.

This International Standard is only applicable to abrasive milling equipment.
