

## DRAFT TANZANIA STANDARD

---

**Petroleum products - Determination of lead content of gasoline –  
iodine monochloride method**

**TANZANIA BUREAU OF STANDARDS**

---

## National foreword

The Tanzania Bureau of Standards is the statutory National standards body for Tanzania, established under the Act.No.3 of 1975, amended by Act.No.2 of 2009.

This Draft Tanzania Standard is being adopted by Petroleum and petroleum products Technical Committee under the supervision of the Chemicals Divisional Standards Committee.

This draft Tanzania Standard is the identical adoption of ISO 3830:1993 Petroleum products - Determination of lead content of gasoline – Iodine monochloride method

## Terminology and conventions

Some terminologies and certain conventions are not identical with those used as Tanzania standards; attention is drawn especially to the following: -

The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, its current practice to use full point on the baseline as the decimal marker.

Where the words “International Standard(s)” appear, referring to this standard they should read “Tanzania Standard”.

## Scope

This International Standard specifies a method for the determination of total lead content in gasolines containing lead alkyls at concentrations between 0,026 g and 1,300 g of lead per litre. This International Standard is not applicable to gasoline containing manganese anti-knock additives
