

Draft Tanzania Standard

**Footwear-Critical substances potentially present in footwear and
footwear components-Lists of critical chemical substances**

TANZANIA BUREAU OF STANDARDS

TANZANIA BUREAU OF STANDARDS

National Foreword

This finalized Tanzania Standard is identical to **ISO/TR16178 Footwear-Critical substances potentially present in footwear and footwear components- Lists of critical chemical substances**, published by International Organization for Standardization.

Terminology and conventions

Some terminology and certain conventions in the ISO standards are not identical with those used in Tanzania Standards and attention is drawn to the following:

Where the words "ISO Standard(s)" appear, referring to this standard they should read "Tanzania Standard(s)".

1. Scope

This document defines lists of critical chemical substances potentially present in footwear and footwear components. This document describes the critical chemical substances, their potential risks of nocuousness, in which materials they could be found, and which test method(s) can be used to quantify them. The test methods listed indicate the state of the art. For some substances, a test method is not available. This document is applicable to any kind of footwear and footwear components.
