

National foreword

This Tanzania Standard is identical to ISO 5630-1: 1991 Paper and board - Accelerated ageing - Part 1: Dry heat treatment at 105°C published by the International Organization for Standardization (ISO).

Some terminologies and certain conventions used in International Organization for Standardization (ISO) are not identical with those used in Tanzania Standards and attention is drawn especially to the following:

The comma has been used as a decimal marker for metric dimensions. In Tanzania, it is current practice to use a "full point" on the baseline as a decimal marker.

Wherever the words International Standard appear referring to this document, they should be interpreted as 'Tanzania Standard.

SCOPE: This standard specifies a method for accelerating the ageing of paper and board by dry heat treatment at 105 OC. This procedure is not applicable to certain high purity papers such as are used for insulation in electrical equipment for which ISO 5630-4 is more suitable.

it does not give any preference for the tests to be made on the paper or board. It is left to the parties concerned to determine which tests are appropriate for the type of paper or board being evaluated.
