

**DRAFT TANZANIA STANDARD**

---

**Containers and accessories for pharmaceutical preparations - Part 7:  
Screw-neck vials made of glass tubing for liquid dosage forms**

**TANZANIA BUREAU OF STANDARDS**

---

## National foreword

The Tanzania Bureau of Standards is the statutory National standards body for Tanzania, established under the Act.No.3 of 1975, amended by Act.No.2 of 2009.

This Draft Tanzania Standard is being adopted by Pharmaceuticals Technical Committee under the supervision of the Chemicals Divisional Standards Committee.

This Draft Tanzania Standard is the identical adoption of an International Standard, ISO 11418-7:2016(Confirmed 2021) *Containers and accessories for pharmaceutical preparations - Part 7: Screw-neck vials made of glass tubing for liquid dosage forms*

This second edition cancels and replaces TZS 1969-7:2017, *Containers and accessories for pharmaceutical preparations - Part 7: Screw-neck vials made of glass tubing for liquid dosage forms*

## Terminology and conventions

Some terminologies and certain conventions are not identical with those used as Tanzania standards; attention is drawn especially to the following: -

The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, its current practice to use full point on the baseline as the decimal marker.

Where the words “International Standard(s)” appear, referring to this standard they should read “Tanzania Standard”.

## Scope

This part of ISO 11418 specifies the design, dimensions, material and requirements of screw-neck vials for pharmaceutical preparations. Screw-neck vials are applicable to primary packs used in direct contact with a drug.

This part of ISO 11418 applies to colourless or amber glass vials made from borosilicate or soda-lime-silica glass, made from glass tubing and intended to be used in the packaging, storage or transportation of pharmaceutical products.
