

DRAFT TANZANIA STANDARD

**Containers and accessories for pharmaceutical preparations - Part 5:
Dropper assemblies**

TANZANIA BUREAU OF STANDARDS

National foreword

The Tanzania Bureau of Standards is the statutory National standards body for Tanzania, established under the Act.No.3 of 1975, amended by Act.No.2 of 2009.

This Draft Tanzania Standard is being adopted by Pharmaceuticals Technical Committee under the supervision of the Chemicals Divisional Standards Committee.

This Draft Tanzania Standard is the identical adoption of an International Standard, ISO 11418-5:2016(Confirmed 2025) *Containers and accessories for pharmaceutical preparations - Part 5: Dropper assemblies*

This second edition cancels and replaces TZS 1969-5:2017, *Containers and accessories for pharmaceutical preparations - Part 5: Dropper assemblies*

Terminology and conventions

Some terminologies and certain conventions are not identical with those used as Tanzania standards; attention is drawn especially to the following: -

The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, its current practice to use full point on the baseline as the decimal marker.

Where the words “International Standard(s)” appear, referring to this standard they should read “Tanzania Standard”.

Scope

This part of ISO 11418 specifies the design, dimensions, material, and requirements of dropper assemblies consisting of a screw cap, dropper bulbs, and pipettes for the application and dosage of liquid pharmaceutical preparations.

This part of ISO 11418 is applicable to dropper assemblies used in the medical field in order to deliver pharmaceutical preparations contained in screw neck bottles according to ISO 11418-1. Dropper assemblies are applicable to primary packs used in direct contact with the drug.
