0 Foreword

The Tanzania Bureau of Standards is the statutory national standards body for Tanzania, established under standards Act No. 3 of 1975, amended by Act No. 2 of 2009.

This draft Tanzania Standard is being prepared by the BCDC 14 Building and Civil Engineering General Technical Committee under the supervision of the Building and Construction Divisional Committee (BCDC).

This draft Tanzania Standard is an identical adoption of the International Standard ISO 10845-1-2020, Construction procurement — Part 1: Processes, methods and procedures published by the International Organization for Standardization.

Terminologies and conventions

The text of the International Standard is hereby recommended for approval without modification.

Some terminologies and certain conventions are not identical with those used as Tanzania Standard; attention is drawn to the following:

The comma (,) has been used as decimal marker (.) for metric dimensions. In Tanzania Standards, its current practice to use a full point on the baseline as decimal marker.

Whenever the words “International Standard” appear, referring to this standard, they should be interpreted as “Tanzania Standard”.

Scope

This document describes processes, methods and procedures for the establishment within an organization of a procurement system for goods, services, and construction works or disposals, or any combination thereof that is fair, equitable, transparent, competitive and cost-effective. This document

- a) describes generic procurement processes around which an employer can develop its procurement system,
- b) establishes basic requirements for the conduct of an employer's employees, agents, board members and office bearers when engaging in procurement,
- c) establishes the framework for the development of an employer's procurement policy, including any secondary procurement policy, and
- d) establishes generic methods and procedures for procurements, including those pertaining to disposals.

This document provides a generic and standard set of processes, procedures and methods for a procurement system which can be applied by both the public and private sector organizations in the development of their procurement system. The principles contained in this document can also be applied down the supply chain.
