National foreword

Tanzania Bureau of Standards (TBS) is a sole National Standards body, established by the Standards Act No. 2 of 2009. It is mandated, among other functions, with formulation of National Standards in all products.

This Draft of Tanzania Standard is being prepared by Roofing and Finishes Technical Committee under the supervision of Building and Construction Divisional Standards Committee

This Finalized Tanzania Standard is identical to **ISO 10874 Resilient, textile and laminate floor coverings Classification**, published by the International Organization for Standardization. (ISO)

Terminologies and conventions

Wherever the words “International Standard” appear, referring to this Tanzania standard, they should interpret as “Tanzania Standard”.

Scope

This International Standard establishes a classification system for resilient, textile and laminate floor coverings.

The classification is based on practical requirements for areas of use and intensity of use and is linked to the

requirements specified in the relevant International Standard for each type of floor covering.

This International Standard is also intended to provide guidance for manufacturers, specifiers and consumers,

to enable them to choose the appropriate class of floor covering for any given area of use or specific room.
