## DRAFT TANZANIA STANDARD

---

**Sensory analysis – General guidance for the design of test rooms**

DRAFT TANZANIA STANDARD FOR STAKEHOLDERS COMMENTS ONLY

## TANZANIA BUREAU OF STANDARDS

---

### NATIONAL FOREWORD

The Tanzania Bureau of Standards is the statutory national standards body for Tanzania, formally established by the Act.No.3 of 1975, which was amended and repealed by Act.No.2 of 2009.

This draft Tanzania Standard is being prepared by the Sensory evaluation Technical Committee, under supervision of Agriculture and Food Standards Divisional Committee (AFDC).

It is identical to **ISO 8589:2007 – Sensory analysis – General guidance for the design of test rooms**, published by International Organization for Standardization (ISO).

### TERMINOLOGY AND CONVENTIONS

The text of the International standard is hereby being recommended for approval without deviation for publication as Tanzania standard.

Some terminologies and certain conventions are not identical with those used in Tanzania standards; attention is drawn especially to the following: -

- 1) The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, it is current practice to use “full point” on the baseline as the decimal marker.
- 2) Where the words “International Standard(s)” appear, referring to this standard they should read “Tanzania Standard(s)”.

### 1 Scope

This International Standard provides general guidance for the design of test rooms intended for the sensory analysis of products.

It describes the requirements to set up a test room comprising a testing area, a preparation area, and an office, specifying those that are essential or those that are merely desirable.

This International Standard is not specific for any product or test type.
