## DRAFT TANZANIA STANDARD

---

**Sensory analysis – Apparatus – Wine-tasting glass**

DRAFT TANZANIA STANDARD FOR STAKEHOLDERS COMMENTS ONLY

## **TANZANIA BUREAU OF STANDARDS**

---

### **0 NATIONAL FOREWORD**

The Tanzania Bureau of Standards is the statutory national standards body for Tanzania, formally established by the Act.No.3 of 1975, which was amended and repealed by Act.No.2 of 2009.

This draft Tanzania Standard is being prepared by the Sensory evaluation Technical Committee, under supervision of Agriculture and Food Standards Divisional Committee (AFDC).

It is identical to **ISO 3591:1977 – Sensory analysis – Apparatus – Wine-tasting glass**, published by International Organization for Standardization (ISO).

### **TERMINOLOGY AND CONVENTIONS**

The text of the International standard is hereby being recommended for approval without deviation for publication as Tanzania standard.

Some terminologies and certain conventions are not identical with those used in Tanzania standards; attention is drawn especially to the following: -

- 1) The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, it is current practice to use “full point” on the baseline as the decimal marker.
- 2) Where the words “International Standard(s)” appear, referring to this standard they should read “Tanzania Standard(s)”.

### **1 Scope**

This International Standard specifies the characteristics of a wine-testing glass to be used for the sensory analysis of wines. This glass may be used for the examination by all types of tests (simple tasting, profile analysis, etc.) of all organoleptic characteristics of wines samples (colour, clarity, bouquet, flavour).
