DRAFT TANZANIA STANDARD

Sensory analysis – Methodology general guidance

DRAFT TANZANIA STANDARD FOR STAKEHOLDERS COMMENTS ONLY

TANZANIA BUREAU OF STANDARDS

0 NATIONAL FOREWORD

The Tanzania Bureau of Standards is the statutory national standards body for Tanzania, formally established by the Act.No.3 of 1975, which was amended and repealed by Act.No.2 of 2009.

This draft Tanzania Standard is being prepared by the Sensory evaluation Technical Committee, under supervision of Agriculture and Food Standards Divisional Committee (AFDC).

It is identical to **ISO 6658:2017 – Sensory analysis – Methodology general guidance**, published by International Organization for Standardization (ISO).

TERMINOLOGY AND CONVENTIONS

The text of the International standard is hereby being recommended for approval without deviation for publication as Tanzania standard.

Some terminologies and certain conventions are not identical with those used in Tanzania standards; attention is drawn especially to the following: -

- 1) The comma has been used as a decimal marker for metric dimensions. In Tanzania Standards, it is current practice to use “full point” on the baseline as the decimal marker.
- 2) Where the words “International Standard(s)” appear, referring to this standard they should read “Tanzania Standard(s)”.

1 Scope

This document gives general guidance on the use of sensory analysis. It describes tests for the examination of foods and other products by sensory analysis, and includes some general information on the techniques to be used if statistical analysis of the results is required.

Generally, these tests are intended only for objective sensory analysis. However, if a test can be used for determining preference in hedonic test, this is indicated.
