Document No. TBS/QMD/PCERT/P05- F	Title: Specific Scheme for the Certification of Cosmetic Products	Revision: 00	Page 1 of 10
Document Type: SCHEME	Prepared by: PCM 	Approved by: DQM 	Effective Date: 2026-03-02

1. INTRODUCTION

This cosmetic Products Certification Scheme is developed by the Tanzania Bureau of Standards under Product Certification Body (PCB) as scheme owner. This scheme is based on type five (5) scheme of ISO/IEC 17067. It includes the following functions and activities:

1.1. Selection, includes planning and preparation:

- a) Receiving application for product certification,
- b) Signing product certification agreement,
- c) Specifying standard to respective client application,
- d) Payment of certification charges,
- e) Communicating the evaluation plan to client.

1.2. Determination, includes:

- a) assessment of the production process and audit of other elements of the client's management system critical to managing product conformity through document review and onsite assessment;
- b) inspection and testing of the product,

1.3. Review, includes:

- a) Examining the evidence of conformity obtained during the determination stage to establish whether the specified requirements have been met.

1.4. Decision on certification, includes:

- a) Granting, maintaining, extending, reducing, suspending and withdrawing certification.

1.5. Licensing, includes:

- a) mark of conformity,
- b) publicity to applicants/licencees,
- c) misuse of certification and marks of conformity.

1.6. Surveillance, includes:

- a) inspection and testing of product samples from the factory and open market,
- b) assessment of the production process.

2. SCOPE

This scheme applies to all types of cosmetics products. PCB has developed factory assessment checklists for cosmetics products under accreditation scope based on relevant code of practice standards.

3. PURPOSE OF SCHEME

Document No. TBS/QMD/PCERT/P05- F	Title: Specific Scheme for the Certification of Cosmetic Products	Revision: 00	Page 2 of 10
Document Type: SCHEME	Prepared by: PCM 	Approved by: DQM 	Effective Date: 2026-03-02

The purpose of this scheme is to provide a set of rules which shall be followed in the certification of cosmetics products. The Product Certification Body (PCB) shall conduct its certification services in accordance with ISO/IEC 17065 and with the requirements of this scheme. The clients of the product certification body (PCB) shall comply with the requirements of this scheme and the product certification agreement (scheme of inspection and testing) (TBS/QMD/PCERT/01/F04-005). The clients shall also comply with any requirements that may be imposed by the relevant product specification and any applicable country legal requirements.

4. PRE-CERTIFICATION ACTIVITIES

4.1. Legal Application Documents

Every client applying for product certification under this scheme shall be operating legally and shall have the following documents:

- a) Tax Identification Number (TIN) Certificate,
- b) Industrial Business Licence,
Other relevant documents are:
- c) Organization structure including QC/QA section,
- d) Premises Layout; The premise is designed to get a logical product flow and avoid cross-contamination
- e) Sketch Map for premises location,
- f) Production Process Flow Chart; The process must detail the sequence of steps in a process from start to finish in visual diagrams
- g) List of Raw Materials and source; with proportions of ingredients (for restricted ingredients and permitted ingredients)-MSDS
- h) Label artwork; must indicate typical ingredients by their specific names in descending order of proportions and preceded by the word "ingredients" and other label requirements as per EAS 346 :2022.
- i) List of outsourced processes,
- j) Human and technical resources (e.g. Laboratories, inspection facilities etc.),
- k) Contact personnel.

4.2. Verification

The TBS Product Certification Body (PCB) reserves the right to verify the authenticity of any documents of certification submitted by an applicant.

4.3. Compliance

The applicant shall ensure that meets the requirements of this cosmetics products certification scheme before applying for product certification and ongoing basis.

4.4. Purchase of Standard

The applicant shall be required to purchase the standard of its product at TBS library

Document No. TBS/QMD/PCERT/P05- F	Title: Specific Scheme for the Certification of Cosmetic Products	Revision: 00	Page 3 of 10
Document Type: SCHEME	Prepared by: PCM 	Approved by: DQM 	Effective Date: 2026-03-02

or by requesting through info@tbs.go.tz or toll-free number **0800110827**.

4.5. Competence of Personnel

Personnel involved in quality verification in the client organizations shall be competent in their duties. TBS Product Certification Body (PCB) reserves the right to verify this competency in terms of checking relevant trainings undertaken and performance evaluations.

4.6. Quality System

The applicant shall meet at least the minimum arrangements stipulated below for quality management of its quality system if not ISO 9001:2015 certified:

- a) Control of non-conforming products,
- b) Control of monitoring and measuring devices,
- c) Control of documented information,
- d) Plan for internal quality checks (identification of points of inspection and testing in the production process),
- e) Records of internal quality checks,
- f) Procedure for handling customer complaints and records,
- g) Schedule for maintenance of machines and records,
- h) Procedure for product traceability and recall.

4.7. Production Process Control Activities

The applicant shall develop and maintain a manufacturing documentation that describes the manufacturing process. The documentation shall also specify aspects tested at all test or inspection points including the final product inspection or testing before dispatch as follows:

i. Incoming material

All incoming material into the process shall be verified for compliance with relevant specifications. Raw materials such as petroleum jelly, wax, fragrances, colorants and preservatives shall have compliance certificates of analysis or compliance reports. In addition to that, the raw materials including fragrances, preservatives, colorants and other additives shall not be the prohibited ones as per TZS 638/EAS 377.

ii. Manufacturing control

The licensee shall ensure that product compliance is monitored throughout the whole production process (in process quality checks). The licensee shall possess or have access to the necessary monitoring and measuring equipment which can establish the status of the requirements specified in the relevant product standard. The equipment shall have valid calibration certificates or reports and these shall be retained and readily available for verification.

iii. Final product inspection

Finished products shall be checked for compliance with all applicable

Document No. TBS/QMD/PCERT/P05- F	Title: Specific Scheme for the Certification of Cosmetic Products	Revision: 00	Page 4 of 10
Document Type: SCHEME	Prepared by: PCM 	Approved by: DQM 	Effective Date: 2026-03-02

requirements of the relevant product standard. Records of such checking shall be retained.

4.8. Product Certification Fees

During product certification process, the client shall be required to pay factory assessment fee, testing charges and annual certification fee as stipulated in The Standards (Fees and Charges) Regulations, available in TBS website www.tbs.go.tz

4.9. Product Certification Process

4.9.1. Application for Product Certification

- a) The applicant shall follow process of obtaining a licence/certificate described in this scheme procedure below.
- b) The electronic application form available in tbs i-SQMT system shall be completed and submitted with the required information at the enquiry stage which include
 - i. Name of product(s) to be certified,
 - ii. Standard or normative document to be used for certification,
 - iii. General features of client including name and address of its physical location,
 - iv. Client activities (process and operations), human resources, technical resources, applied contractual control of outsourced process and operations (if any) and legal obligations detailed in 4.1 above.
- c) The product certification agreement (TBS/QMD/PCERT/01/F04-005) shall be completed after fulfillment of certification application requirements.
- d) The assigned inspector (s) shall come up with an assessment plan for factory assessment as required by the relevant product standard.

4.9.2. Evaluation

i. Factory Assessment

- a) The factory assessment shall be conducted at the client's premises. This assessment shall include assessment of premises, production process control activities as per section 4.7, verification of the client's product quality management system and examination of the client's documents as well as a compliance checking of the client's products.
- b) The inspector (s) shall be guided by the assessment plan (TBS/QMD/PCERT/01/F02-004) and respective factory assessment checklist in carrying out the assessment.
- c) Sampling
 - 1) Samples must be taken randomly from production line/batches to avoid bias.
 - 2) The sample size shall be as per product certification economic sample guide manual.
- d) After assessment activities have been completed, the assigned inspector (s) shall

Table 2: Specific Requirements for the product covered in the scope of this scheme

S/ No	PRODUCT	TESTING PARAMETERS	Frequency per certification cycle
1.	Petroleum jelly for cosmetic industry	As per TZS 318 (Part 2): (2nd Ed)	2 to 4
2.	Skin care creams, lotions and gels	TZS 313:(3rd Ed)/EAS 786:	2 to 4

4.9.3. Review

- The certification officer who was not involved in evaluation process shall review evaluation results.
- Preparation of licence shall be done if evaluation results comply to the requirements.
- Client shall be notified to take corrective actions if evaluation results do not comply with requirements.

4.9.4. Certification Decision

All product certification decision process shall be initiated after all the certification conditions have been met. All clients are promptly informed through electronic system of the certification decisions made and corrective actions required. Upon receiving notification on corrective action taken by the client, the inspector is sent for verification of non-conformities that had been raised during factory assessment and/or drawing re-test sample(s) and the process proceeds from clause 4.9.2 to 4.9.3.

4.9.5. Certification Documentation

- The licence/certificate and its respective documents which are Facsimile (TBS/QMD/PCERT/01/F04-006) and Schedule A (TBS/QMD/PCERT/01/F04-003) convey all information regarding name and address of Product Certification Body (PCB), the date certification is granted, name and address of the client, type of the product, brand name of the product, expiry date of the licence/certificate, specification used and the obligations pertaining to TBS and the client.
- The authentic TBS licence/certificate the signature of the DG, the TBS seal and

electronic mark.

- c) No formal product certification documentation is issued to the client unless, the decision to grant or extend the scope of certification has been made, certification requirements have been fulfilled and certification agreement has been completed/signed.
- d) The licence/certificate issued are valid for one year. Licence/certificate shall be renewed annually after re-assessment of the client's product conformity.

5. POST CERTIFICATION ACTIVITIES

5.1. Use of Licences, Certificates and Control of "tbs" quality mark

The Completed Product Certification Agreement (TBS/QMD/PCERT/01/F04-005) and the following conditions shall apply:

- a) The client may publicize the fact that certification has been granted and use the licence as evidence.
- b) The client shall not misrepresent the nature, status or scope of certification.
- c) The client shall strictly adhere to the use of the "tbs" mark of conformity as governed by Section 18 of The Standard Act, Cap 130, Regulation 3 of The Standards (Registration of Premises and Certification of Products) Regulations of 2021 as well as per licence document schedule A (TBS/QMD/PCERT/01/F04-003).
- d) The client shall mark the certified product with "tbs" standard mark as illustrated by facsimile document (TBS/QMD/PCERT/01/F04-006) for licence and for the certificate the words 'APPROVED BY TBS TPC No.' will be used.
- e) The conformity mark shall be applied to products manufactured at the premises where certification was conducted and which fall within the scope of certification as stipulated in the license/certificate.

5.2. Directory of Certified Products

The PCB has in place an electronic system (iSQMT) that serves as directory for certified products and the information is made public through the biannual magazine namely "Announcer" and TBS official website "www.tbs.go.tz".

5.3. Surveillance Activities

- a) Surveillance for both factory and open market is conducted at least two (2) factory surveillance assessment and (2) market surveillance assessment and should be conducted in the preceded certification cycle. Maintenance of licence/certificate include compliance with conditions of the product certification agreement (TBS/QMD/PCERT/01/F04-005), that provides for the obligations of the licensee and the product certification body (PCB).
- b) Samples for certified products are collected based on risk sampling whereby sample from the factory and open market are collected to ensure on-going fulfilment of product certification requirements.
- c) Should the scope include more than four brands, the brands not sampled in the

previous surveillance will be considered for the next surveillance.

- d) In the event that this is not possible, the licensees will be obliged to provide production status in order to support their continued certification.
- e) The surveillance visits shall be unannounced or announced. Where a visit shows non-compliance, the licence/certificate holder shall be required to institute corrective actions.
- f) The surveillance on open market shall also be conducted when there is a complaint over certified products. Whenever such assessment is conducted, the manufacturer shall be issued with a copy of the assessment report. Manufacturers shall be requested to disclose their markets to enable open market surveillance to be conducted. Where non-conformities are detected in the open market, the client shall be required to institute corrective actions which may involve product recall or replacement.

5.4. Non-Conforming Products

The licence/certificate holder shall have procedure for product traceability and recall which shall be used to trace and recall the product from the market when such product no longer fulfils product certification requirements.

5.5. Termination, Reduction, Suspension and Withdrawal of Certification

TBS Product Certification Body (PCB) reserves the right to terminate, reduce, suspend or withdraw certification under conditions stipulated in the product certification agreement (TBS/QMD/PCERT/01/F04-005).

5.6. Re-Instatement of Suspended License

PCB may re-instate the suspended license upon request and compliance of the corrective action made.

5.7. Complaints and Appeals

- i. All complaints and appeals related to product certification shall be handled as per customer complaints and appeals handling procedure TBS/QMD/PCERT/P02 and the complainant is informed on the outcome of the investigation.
- ii. Upon receipt of a formal complaint or appeal, which is related to product certification, Product Certification Body (PCB) shall acknowledge receipt of the same through letters, email or electronic system (i-SQMT) and inform the client appropriately.
- iii. The decision in resolving the complaint or appeal is reviewed and approved by personnel who were not involved in the product certification activities related to the complaint or appeal.
- iv. Complainants are informed on the outcome of investigation through letters, email or electronic system (i-SQMT).
